

Organic and Sustainable SKYN Clinic and Apothecary - A Holistic Approach to Skin Care

All-Natural Custom Blend Products and Non-Surgical Skin Care Alternatives

SUWANNEE, GA, USA, June 23, 2014 /EINPresswire.com/ -- Organic and Sustainable SKYN Clinic and Apothecary - A Holistic Approach to Skin Care

All-Natural Custom Blend Products and [Non-Surgical Skin Care](#) Alternatives

SKYN Clinic and Apothecary is a corrective skin clinic, specializing in non-surgical [skin care alternatives](#). Taking a holistic approach to skin care, SKYN's treatments are guaranteed to make skin clear and beautiful using botanical and medical grade ingredients. According to ABC News, 75% of Americans who are looking for cosmetic procedures opt for non-surgical treatments. "On our travels we noticed that most celebrities visit international skin clinics to treat their skin or to get the healthy skin that you see on the movie screen. Why not here in the US?" Says Zola Nemorin, Founder of SKYN Clinic and Apothecary. Nemorin goes on to say, "You can have healthy, clear, ageless skin too." Providing both an alternative to cosmetic surgery, and simply the perfect place to maintain good looks, SKYN delivers results of natural, radiant skin.

At SKYN, products are custom-blended by hand. Custom Blend products contain the highest level of active ingredients and the lowest practical level of preservatives. Studies show that Custom-Blended skin care may be up to 400% more effective than traditional off-the-shelf skin care products. Working with small farmers all around the world who practice sustainable agriculture, while the plant material is processed naturally on the same land where it is grown, the whole cycle sustains itself within its own carefully-managed ecosystem. With SKYN, having an Apothecary and Blending Bar allows a skin care professional to make products at the point-of-sale to meet only the specific skin care needs of the customer.

About SKYN Clinic and Apothecary

Apothecary is an historical name for a wellness professional that formulates and dispenses healing herbs to physicians, surgeons and patients. In its investigation of herbal and chemical ingredients, the work of the apothecary is regarded as a precursor of the modern sciences of

chemistry and pharmacology. "The products used internationally are more 'natural'. They use a lot of botanicals and essential oils. We all know the key to anti-aging is found in our natural elements, like herbs and the sea." Zola Nemorin explains. Technological advances offer alternatives for traditional surgical procedures such as face lifts and liposuction, with no downtime and no anesthesia

Consumers
