

Training for Excellence Reveals New Website 'How To Provide On-The-Job Training & Coaching'

Florida-based training facility Training for Excellence has recently launched their new website outlining their new On-The-Job Training and Coaching workshop.

SARASOTA, FLORIDA, USA, July 10, 2014 /EINPresswire.com/ -- International training vendor, Training for Excellence, launched their new website WeHelpTrainers.com which explains their new course, "How To Provide On-The-Job Training and Coaching." Participants of this workshop will learn how to become effective and efficient trainers, leaders, and coaches within their respective companies. The goal of the website's revamping was to more closely reflect the experience that students would leave with after attending the Training for Excellence workshop.

The 2-day course was developed to help train employees in supervisory positions who are responsible for training their own employees.

V.P. and owner of Training for Excellence, Donna Garnvik, has had over 15 years of experience leading the company through developing innovative training programs. In response to the new look and feel of the WeHelpTrainers.com website, Donna comments, "We are very happy about our new website and logo, both of which truly capture the essence of what our company is all about." People perusing the site will immediately get a feel for Training for Excellence's brand of programs, and what participants can anticipate to gain from attending the unique workshop. The participant-centered On-site Train the Trainer Courses, Public Train the Trainer Courses and On-The-Job Training & Coaching Course are based on accelerated learning and adult learning strategies to improve students' retention and comprehension of information.

"We've been working very hard to put all the pieces together for our newly developed On-The-Job Training and Coaching workshop. It was initially a response to a need in the oil & gas industry, but the program is now ready to be offered to a wider variety of companies across other industries. The fact that it was ready to go at the same time our new website was set to be launched was perfect timing for both us and our clients," says Garnvik regarding the new workshop.

The oil and gas industry is facing a major hurdle as many employees are retiring, making room for new employees who need to be fully trained. Training for Excellence's new workshop is

designed specifically to help prepare supervisors and managers in training roles and empower them to effectively and efficiently train their own employees in order to reduce any project delays already being experienced by their organizations.

About Training for Excellence and WeHelpTrainers.com: Training for Excellence, a Florida-based training vendor, is a known leader in the field of development and training. Not only do they offer trainer workshops, but they also offer PowerPoint development and redesign, a presentation skills course, and instructional design consulting.
