Dr. Johanna Youner now offers PICOASURE FOCUS® FOR SKIN REVITALIZATION AT Park Avenue Laser Treatment in New York City

New York, NY July 18, 2014 – Park Avenue Laser Treatment by Dr. Johanna Youner now offers PICOASURE FOCUS® Laser Facials for Skin Revitalization, providing dramatic results through a faster, PicoSecond treatment without the typical downtime or discomfort!

“The PICOASURE FOCUS® for Skin Revitalization ,” is a faster, gentler treatment says Medical Director Dr. Johanna Youner of Park Avenue Laser Treatment in New York City. “Patients report a much more comfortable treatment and the results are similar to non-ablative and even ablative lasers.”

PicoSure® technology utilizes unique patented PressureWave™ technology unlike traditional lasers that rely on thermal energy which can lead to significant downtime. The unique mechanism of action creates tiny focal injuries within epidermis leading to new collagen and elastin production without injuring the surrounding tissue. The treatment is very simple and yields a beautiful result.

Approved by the FDA in 2012, the PicoSure® laser treats tattoos, benign pigmented lesions, age spots, freckles and enables skin revitalization treatments unlike any other. The treatments can be done on most parts of the body with less discomfort than traditional lasers.

"Our PicoSure [Laser Facial](#) results have been outstanding", states Dr. Youner. One treatment with Dr. Youner's PicoSure FOCUS will decrease fine lines, uneven pigment, brown spots and acne scars. One ten minute laser facial treatment with the PicoSure FOCUS will provide a more refined appearance to the skin. This treatment is revolutionary in its speed and gentle treatment to the skin of the face. PicoSure FOCUS can be used on hands, forearms, décolletage, or any areas that need refining from aging and sun damage.

About Park Avenue Laser Treatment

Park Avenue Laser Treatment by Dr. Johanna Youner at 40 Park Avenue in New York City provides customized PicoSure and Nd-Yag laser treatments for laser facials, fungal nail treatments, pigment changes, tattoo removal and full body skin revitalization. Dr. Youner uses the most progressive laser, the PicoSure Picosecond lasers as well as a Q-switched Nd-Yag to provide the fastest and most dramatic results in skin revitalization.
