nexMatrix Now Shipping Next Generation IP PBX

Protel LTS brings simplicity and logic to PBX provisioning

NAMPA, ID, USA, July 22, 2014 /EINPresswire.com/ -- nexMatrix Telecom, Inc. announced today that a major update of its PBX programming application is now shipping to VARs and affiliate partners.

According to Dianne Ursini, C.E.O. and President of nexMatrix Telecom, Inc., the Protel PBX LTS version (Long Term Stable) is a complete rewrite of its versatile IP PBX platform, with a redesigned user interface and an overhaul of the underlying frameworks.

"Protel LTS is a major leap forward for us," Ursini said. "Our easy-to-use programming interface, coupled with knowledgeable and responsive technical support, gives our resellers and installation partners an incredibly versatile and robust PBX product that is proudly made in the USA and that they can recommend confidently to their customers," she added.

nexMatrix was one of the first manufacturers to offer a true IP telephony appliance, starting with the release of the VoIPTelcaster in 2002. The company now offers a line of premise-based and cloud PBX products that service businesses of any size, ranging from SOHO customers needing just a few extensions to enterprise deployments. The company also designed and markets its own softswitch and offers business-class SIP trunking to customers, along with a wholesaler/rebranding platform that allows small companies to offer complete phone services under their own brand name, including an automated billing solution.

According to Ursini, the Protel PBX LTS version will carry the company forward until at least 2020. "We have invested a tremendous amount of development effort to bring this project to completion," she said. "Our reseller partners now have the most advanced PBX system available on the market today. No other manufacturer offers the features, flexibility and competitive price points that the Protel does, and we are extremely excited for the future of this company," she added.

Interested customers and reseller partners are invited to visit www.protelpbx.com and to contact nexMatrix Telecom at 208-697-5808 for more information. Ms. Ursini's blog at dianneursini.com contains additional information and commentary about LTS and other topics. Existing partners should contact their sales representative for additional details on pricing and

available options.
