

# Distributed Information Technologies to Acquire Clango Group, Inc.

*DIT expands its Information Security capabilities with the acquisition of Clango Group*

ARLINGTON, VA, USA, July 25, 2014 /EINPresswire.com/ -- Distributed Information Technologies, Inc. (DIT), a leading provider of IT consulting services and software solutions, today announced that it has signed a definitive agreement to acquire Clango Group, Inc. The acquisition enhances DIT's commitment to information security by expanding the company's capabilities into the areas of Identity and Access Management (IAM) Advisory Services, Access Governance, and Risk Management.

"Information security is not only front-page news, it's a top area of concern of many of the nation's leading CEOs," said Duane Graham, Founder and Chief Executive Officer, DIT. "IAM as a discipline ensures that only authorized personnel have access to an organization's sensitive data. As workforces continue to become globally dispersed and data privacy legislation aggressively evolves, it will be critical for organizations to have effective IAM programs in place to adaptively protect information within an ever-changing threat landscape. Additionally, the proliferation of federal and international data privacy legislation has created an environment that relies heavily on an effective IAM program. Clango Group delivers cutting-edge IAM strategy expertise and market research capabilities that are highly complementary to DIT's existing application security services portfolio."

Based in Minneapolis, MN, Clango Group provides advisory services focused on the thoughtful evolution of identity management, IT access governance, and trust brokerage services. Kamille White, President and Founder of Clango Group, Inc., said of her company's acquisition by DIT, "I am excited about the opportunities this partnership provides in expanding our delivery of comprehensive IAM Advisory Services nationwide. The need for effective IAM strategy is significant, and we can help our client partners every step of the way. The combined capabilities of these organizations will provide a powerful suite of security solutions to a broad set of clients."

This acquisition, when combined with the capabilities of DIT's wholly-owned subsidiary, Integral Business Solutions, positions DIT to more fully engage with clients across a broad spectrum of information security disciplines, from high-level IAM strategy to the integration of complex anti-fraud and application security solutions.
