

Dr. Brisman And Dr. Pile-Spellman Named In New York Magazine's 'Best Doctors 2014' List

Jonathan L. Brisman, M.D. and John Pile-Spellman, M.D., F.A.C.R. have been named to New York Magazine's 2014 "Best Doctors" list.

ROCKVILLE CENTRE, NY, USA, July 29, 2014

/EINPresswire.com/ -- Dr. Pile-Spellman is the only Long Island interventional neuroradiologist selected for New York Magazine's 2014 list, while Dr. Brisman is one of two [Long Island-based neurosurgeons](#) chosen, and the only Nassau County neurosurgeon on the list. Both are attending physicians with the [Neuroendovascular Center](#) of Neurological Surgery, P.C., one of the Northeast's leading practices of neurosurgeons and allied specialists.

"We congratulate our colleagues on receiving this honor," said Michael H. Brisman, M.D., F.A.C.S., CEO at Neurological Surgery, P.C. "Our practice provides the most comprehensive and advanced university-level care available on Long Island, as their selection for this list confirms."

The names on the magazine's "Best Doctors" list are provided by Castle Connolly Medical Ltd., a

New York City research and information company. Castle Connolly publishes an annual guidebook, Top Doctors: New York Metro Area, which lists those Castle Connolly has determined to be in the top 10 percent of the region's physicians—nearly 6,500 in all. Castle Connolly provides New York Magazine with a shorter version of this list for the magazine's "Best Doctors" issue. Space prohibits New York from publishing the full list; this year, the doctors on the magazine's list number 1,251.

“

Our practice provides the most comprehensive and advanced university-level care available on Long Island, as their selection for this list confirms.”

Michael H. Brisman

Five other NSPC physicians are listed in the current edition of Castle Connolly's Top Doctors book, along with Drs. Brisman and Pile-Spellman: Jeffrey A. Brown, M.D., F.A.C.S., neurosurgeon

specializing in the treatment of trigeminal neuralgia, brain tumors and pain surgery; Alan B. Ettinger, M.D., M.B.A., neurologist specializing in the treatment of epilepsy; John A. Grant, M.D., F.A.C.S., who specializes in pediatric neurosurgery; Robert N. Holtzman, M.D., neurosurgeon specializing in cranial, spinal and peripheral nerve surgery; and Stephen T. Onesti, M.D., F.A.C.S., neurosurgeon specializing in spine surgery.

Dr. Pile-Spellman is an international leader in interventional neuroradiology, a field of medicine that uses image-guided catheter-based techniques to treat diseases of the blood vessels of the brain and spine. With more than 150 peer review scientific papers to his name, Dr. Pile-Spellman is actively involved in stroke research. He continues his research activities at Columbia University's School of Engineering, Biomedical Engineering Department.

Dr. Brisman was the first [endovascular neurosurgeon](#) on Long Island, dual fellowship-trained in both cerebrovascular neurosurgery and interventional neuroradiology. One of approximately 100 surgeons in the U.S. trained in both techniques, Dr. Brisman authored landmark papers in the New England Journal of Medicine and Lancet Neurology. Dr. Brisman serves as Director, Cerebrovascular and Endovascular Neurosurgery, Winthrop-University Hospital (Mineola, NY) and holds the same title at South Nassau Communities Hospital (Oceanside, NY).

To select the physicians, Castle Connolly conducts a peer-review survey of physicians in the region. Surveyed physicians are asked to nominate doctors they consider exceptional, as well as those they judge to be the best in their own fields and related fields. Nominees are vetted to insure that they are board certified and licensed, and to investigate their disciplinary histories. The nominee list is adjusted to achieve geographic balance and balance across specialties.

About Neurological Surgery, P.C. - Neurological Surgery, P.C. is one of the New York City area's premier neurosurgical groups, offering patients the most advanced treatments of brain and spine disorders. These include minimally invasive procedures such as stereotactic radiosurgery (Gamma Knife® and CyberKnife®), aneurysm coiling, neuro-endoscopy, spinal stimulators, carotid stents, interventional pain management, microdiscectomy, kyphoplasty, and X-STOP®. The practice's physicians represent a range of surgical and nonsurgical specialties, combining compassionate care with highly specialized training. They are leaders in the region's medical community, with appointments as chiefs of neurosurgery in some of Long Island's best hospitals. NSPC offers eight convenient locations in Queens, Nassau and Suffolk Counties. For more information, call 1-800-775-7784 or visit www.NSPC.com.
