Two New Updates Available for the Client Beta Version of Haypi Kingdom: The Return of the King

Haypi Co Has Proved to be Extremely Productive - With New Game Releases and Updates Coming One After the Other

SHANGHAI, SHANGHAI, CHINA, August 1, 2014 /EINPresswire.com/ -- Haypi Co., Ltd has proved to be extremely productive, with new game releases and updates coming one after the other. For a really short period, the mobile developer has released two more updates 0.9.10 and 0.9.11 for the client beta of Haypi Kingdom: The Return of the King. That is Haypi's new strategic war game, which is under closed beta test at the moment.

Haypi Adventure: Kingdom of Glory

Haypi has also prepared a full update of another game - Haypi Adventure: Kingdom of Glory. It is an MMO of the war strategic genre. Haypi's team has now reached the final development phase of the 1.1 update for the game, and it will be released in the nearest future! When this iOS game was first released, Haypi Adventure: Kingdom of Glory was included in the "Featured" part of the AppStore in over 20 countries/regions (at AppStore> Categories> Games> Simulation or Strategy> New). This was an amazing appreciation of Haypi's fervor to create exciting games for their numerous fans. Haypi is grateful for the love and support of the players.

There are lots of useful modifications made to client beta version of Haypi Kingdom: The Return of the King. The developer has been improving it constantly. The optimizations in both of the latest updates (versions 0.9.10 and 0.9.11) are made on the basis of the players' feedback. Haypi would like to share What's New.

There were a lot of improvements made in the 0.9.10 update. For example, Optimizations have been made to the interface for the Activities, the Heroes, and the Shop. Display adjustment has been made to the Defense section of the Barracks. Reminding indicators have been added and players can immediately take notice of the available activities or events. Info and details about Resource Transport amongst cities are now viewable. Chat feature has been optimized. Bugle icon has been beautified. Tips have been added to the loading pages. And of course, General improvements and display optimizations have been made.

Concerning the newly released 0.9.11 update of Haypi Kingdom:The Return of the King, there are even more additional improvements. Again, they are made according to the players' feedback. In the

latest version, players are able to search and locate a player in the World Map by username. They can now quick-return to the last site that they were located at. Neutral sites, Allies, Enemies and places belonging to a certain player are now distinguished by colors on the World Map.

Of course there are also General display optimizations and improvements made in the 0.9.11 update of Haypi Kingdom: The Return of the King. Among the other changes, players will notice that Coordinates are now viewable in combat reports. Players can now quick-locate the site by tapping its icon in the report. In addition, now players can see all building site grids around the outer area of the city. Fortunately, the game is much smoother now, especially when it comes to using Speed Up cards, making Hero refresh, or when equipment is selected. Now it is easier to check the level of the buildings in the city (Town Hall, Stable, University and Warehouse). In addition, the input function of the typing window has been improved, including composing of messages, editing of profiles, introducing alliances, etc.

It's amazing that Haypi fans have formed such a well-united community. Their love for Haypi is returned and their voice does make a difference.
