

DDoS-Guard Has Introduced Real-time Protection Against DDoS Attacks

The number of DDoS attacks on WEB resources is growing daily, especially in politically unstable countries.

VILNIUS, LITHUANIA, August 5, 2014 /EINPresswire.com/ -- DDoS-Guard has introduced a series of secured solutions and servers which guarantee automatic real-time protection to our customers against any type of Distributed Denial of Service (DDoS) attacks.

The number of [DDoS attacks](#) on WEB resources is growing daily, especially in politically unstable countries. That poses a risk to the availability of the resource (including Mass Media) and, consequently, loss of audience and business.

DDoS-Guard.net provides a wide range of custom solutions to protect customers from any volume DDoS attacks. Our customers can conveniently protect their web resources while staying with their preferred hosting provider as well as transfer to DDoS-Guard secured hosting solutions. We also offer dedicated server solutions in secured network environments or a possibility to protect your virtual private network [against DDoS](#) attacks through our "Protected IP-Transit" service. We have built a sophisticated geo-distributed load balancing and filtering system with high-speed nodes in USA, Netherlands, Germany, Russia and Ukraine. In case of the attack, the system automatically detects and filters the data in real-time, therefore, there is no interruption or delays in the availability of the web resource and no need of any action on the customers side.

The solutions offered match any scale corporate customers – hosting providers, network operators and data centers all over the world. We also offer protection for consumers at a price of \$150 per month which includes [DDoS protection](#) up to 140 Gbps and a competent 24-hour customer service bringing our private customers full confidence of their online business security.

As the company CCO Igor Pakhomov said: "In today's informational war, DDoS-attacks can be compared to massive artillery when a resource is under attack with big amounts of data being sent/received, until it becomes unavailable for readers and subscribers. Recently, millions of online readers monitor news in real time, thus it is critical to protect the reliable source of

information as well as the business itself. And nowadays, it is not only possible, but much needed."

To start using our services all you have to do is register, choose the services you need and conveniently pay through several available options: Visa, Mastercard, PayPal, Wire Transfer, Skrill and Webmoney.
