

HTML5 Digital Flipbook Creator for Improving Digital Magazines to a Higher Level

PUB HTML5 now brings improved quality solutions for creating beautiful digital magazines, helping users to reach the audiences with an engaging content.

HONG KONG, HONG KONG, CHINA, August 12, 2014 /EINPresswire.com/ -- Publishing digital magazines is easier now with the new digital flipbook creator software introduced by [PUB HTML5 digital magazine software](#) provider. The easy-to-use software allows users to quickly create digital magazines, brochures and catalogs, by adding rich media and animations. This free to use digital publishing platform allows to create stunning page-turning and interactive digital pages.

More than 30,000 organizations and individuals are using this flexible [HTML5 digital flipbook creator](#) for creating their digital content and reaching their respective audience base. The software allows users to present their content in an exciting manner before their audience. This creates more value and helps deliver the message in a convincing manner. More importantly, the published content can be accessed through a host

of handheld devices working on various platforms, including Android, iOS and Windows 8.

According to the company spokesperson, more than 1,50,000 catalogs, brochures and magazines are hosted on PUB HTML5. "We allow people to host their digital content with us, and one can distribute their content on the web without having a website," the spokesperson reveals. There are several new and amazing features that allow the creation of HTML5 interactive digital magazine with a custom look and feel. One can choose from a wide variety of available themes, templates and backgrounds to create a unique digital publication to draw the attention of their audience base.

Though the new software comes with enhanced technical capabilities, but one needs not to have any technical knowledge to use it and accomplish a jQuery and HTML5 flipbook. It allows adding all types of rich media, such as audio, video, animation, images, live links to make it more interactive. The idea

is to offer a unique multimedia experience to the readers to increase their interest in the product or the offering.

The new and free [flip book publisher by PUB HTML5](http://pubhtml5.com/) is expected to redefine the digital experience of the modern audience. Since the digital content could be shared on social media networks, it allows users to reach their target audience speedily and more specifically. One can learn more about the features and technical specifications of this new solution by visiting the website
