

Flyshark: A New Concept in Folding Keyboard Technology

DENVER, COLORADO, UNITED STATES, August 14, 2014

[/EINPresswire.com/](http://EINPresswire.com/) -- Flyshark is a unique folding keyboard. Yes, it does fold, and yes, it connects to smart devices such as IOS and Android phones and tablets. However, it uses cutting edge technology to make it the best folding keyboard available. The Flyshark incorporates Bluetooth connectivity, making it [easy to connect to smart devices](#), and giving it excellent response time. No wires, no docking ports – just the device and the keyboard. The wanmei feng Vbest tech team carefully tested a variety of keyboards. Some are too small for normal typing, some have shallow beds for the keys, leading to typist fatigue. Others require the typist to learn an unusual key configurations. Flyshark's keys are designed to have excellent spring-back action, allowing users to utilize their normal typing skills. The next consideration was the type of tray that would hold the key mechanism. Although they originally thought a moldable plastic tray would make manufacture easy, the team decided that in order to make the plastic too thick and heavy to comfortably fit the keyboard into a pocket or bag. Therefore, the material

selected was a light-weight aluminum with an aerospace plastic hinge that held up exceptionally well during testing. Upon opening, the scissor hinge under the keyboard pops it up for responsive typing. The Bluetooth chip that powers the keyboard has about 60 days of standby charge, and about 20 days of typing charge, even if you type for 6 hours per day. This makes it ideal for taking notes or writing inspired poetry in a remote setting.

The wanmei feng Vbest team of five enthusiastic entrepreneurs have invested two years of time and money in developing the prototype for the Flyshark. They have obtained all the necessary patents to be able to market their device. However, they have run up against the hard fact that mass production needs funding. They will produce the Flyshark whether their Kickstarter [Flyshark crowdfunding campaign](#) succeeds or not, but crowdfunding would make this process go so much more smoothly.

Even readers who decide not to fund the project, will enjoy visiting the Kickstarter Flyshark webpage. The team has posted illustrations, diagrams and explanations that take the visitor step by step through the Flyshark development process. Furthermore, they have carefully fulfilled all of the Kickstarter sections, even explaining why they could use some help with getting Flyshark out there and into the hands of the public. The Flyshark crowdfunding campaign is as well designed as the very handsome folding keyboard. Users can even get designs of their choice engraved on the sturdy aluminum skin. Rewards for contributions to this campaign are as follows:

- \$1.00 – sincere thanks, and your name displayed on www.flyshark.mobi as a contributor.
- \$5.00 – More thanks, and a super nifty baseball cap with the Flyshark logo.
- \$55.00 – a silver Flyshark, free shipping in the United States, and 2 months opportunity to exchange any defective keyboards. Add \$10.00 for shipping outside the US. This is an early bird special – limit 500.
- \$65.00 – a black Flyshark, including that early bird special package, just like the silver one.
- \$75.00 – a unique gold colored Flyshark – with the shipping and returns package for early bird contributors. Or you can get an Apple White keyboard instead.
- \$95.00 – A silver Flyshark, with a Flyshark baseball cap – and the early bird package.
- \$100.00 – A black Flyshark, with baseball cap – and the early bird package.
- \$115.00 – A silver Flyshark, baseball cap, early bird package AND Bluetooth pairing.
- \$120.00 – A black Flyshark, baseball cap, early bird package AND Bluetooth pairing.
- \$150.00 – A golden Flyshark, , baseball cap, early bird package AND Bluetooth pairing.
- \$200.00 – any two Flysharks in your preferred color, information printing on your own Flyshark, 2 baseball caps, and Bluetooth pairing.
- \$3000.00 or more: Ten PCS keyboards in your choice of color, gifted with choice of engraving on each, and options for selling them in your local area. Also, contributors have the option of touring the Plastic Factory Hardware Factory.

The Flyshark [Kickstarter crowdfunding campaign](#) is well-designed and presents a responsibly developed, practical yet attractive product that any smart device owner can be proud to use. Visit the page, look around, Tweet it or Like it on Facebook even if contributing isn't an option. This campaign is well worth your time.

About:

Wanmei Feng Vbest tech is a team of five technology enthusiasts. They have spent time, money and energy during the last two years to develop the Flyshark, an ergonomic, convenient, attractive Bluetooth wireless folding keyboard. No doubt, once this project is in production, this team is likely to turn out more innovations.
