Professionally Secure LLC Announces the Nationwide Release of 'PC on a Stick' a Secure Bootable USB

Professionally Secure LLC today announced the nationwide release of its product PC on a Stick. Say goodbye to computer viruses and hello to online privacy!

FAIRFAX, VA, USA, August 20, 2014 /EINPresswire.com/ -- [Professionally Secure](#) LLC today announced the nationwide release of its product [PC on a Stick](#). The small, portable [bootable USB](#) features its own operating system and provides users with a secure computing environment that keeps them safe from viruses and malware as well as protect their online privacy. The bootable PC on a Stick is available with capacities ranging from 2 GB to 64 GB with a starting price of $14.95.

How it Works

> "
> Thus, any viruses or malware the user might have picked up in a previous computing session are simply gone the next time the user starts the bootable USB."
>
> *Mr. Shenouda, President, Professionally Secure LLC*

"Professionally Secure bootable PC on a Stick uses a non-persistent operating system that 'starts fresh' every time the user boots from the USB," explained Mr. Shenouda, President, Professionally Secure LLC. "Thus, any viruses or malware the user might have picked up in a previous computing session are simply gone the next time the user starts the bootable USB."

Another added advantage to the non-persistent operating system is the fact that nothing is ever saved by the operating system, including internet browsing history and activities. For this reason, it is impossible, even for top forensic analysts, to recover any user activities from Professionally Secure bootable USB.

Professionally Secure has developed very thorough video tutorials on how to use the product available on website.

Professionally Secure Advantage

Professionally Secure developed two versions of the PC on a Stick product: Secure PC Pro and Secure PC Xtreme. With Secure PC Pro, the company figured out a way to make the bootable PC on a Stick highly functional and portable, giving the user the ability to save and access files from any machine, any operating system, anywhere. Secure PC Xtreme, on the other hand, includes some of the best anonymity and security tools that enable users to use the internet anonymously without a trace and circumvent firewalls and censorship.

Professionally Secure products are custom developed using some of the best USB drives in the market. All of the products have high read/write speeds as the capacity increases. In fact, USB 3.0 is used for 8 GB capacities and higher. Pricing starts at $14.95 with free domestic shipping offered on all products.
