

ISO27001 packaged solutions from IT Governance designed for tackling the 'eternal marathon' of fighting cyber crime

IT Governance has just released four ISO27001 packaged solutions to help businesses throughout Europe tackle the 'eternal marathon' of fighting cyber crime.

BRUSSELS, BENELUX, August 21, 2014 /EINPresswire.com/ -- [IT Governance](#), the global leaders in information security solutions, have just released four [ISO27001 packaged solutions](#) to help businesses throughout Europe tackle the 'eternal marathon' of fighting cyber crime.

In a press release issued earlier this year, Professor Udo Helmbrecht, Executive Director of the European Union Agency for Network and Information Security (ENISA), described the battle with cyber criminals as an "eternal marathon...the political and societal demands on cyber security are constantly rising. This will be even more so in the future."

European organisations need to act now to protect their assets and infrastructure. The situation is only likely to worsen as more companies move their data on corporate networks, the Cloud and mobile devices.

[ISO/IEC 27001](#) is the only international information security management standard that can help organisations protect their information assets, comply with legislation and thrive despite increased cyber risks.

IT Governance's ISO27001 packaged solutions help businesses deploy world-class cyber security resources to protect their assets and infrastructure, comply with local legislation and thrive as a business.

Each of the four solutions contain books, documentation templates, training and/or consultancy, which are all accessible online and available at a fixed price. The new packages from IT Governance provide transparent and simplified approaches to ISO27001 certification that is not offered anywhere else in the world.

Alan Calder, founder and executive chairman of IT Governance, said, "If understood and implemented correctly, ISO27001 can help to rationalise security expenditure and reduce the impact of cyber crime, while giving a business a competitive edge."

The all-in, ISO27001 'Do-it-yourself', 'Get a little help', 'Get a lot of help' and 'We'll do it for you' packages can be booked online at www.itgovernance.eu/t-iso27001-solutions.aspx
