

# The Cerberus Group Names E-Racer Tech as Sole Tech Support Provider

*Local Tech Support Company Will Oversee Business Tech Solutions*

DELRAY BEACH, FL, USA, September 11, 2014 /EINPresswire.com/ -- [The Cerberus Group](#), a full service mobile technology and data solutions provider for small businesses, has named E-Racer Tech as its remote tech support resource.

E-Racer Tech, is a local enterprise, US based tech support company who provides outsourced, on-site and remote IT support for PC's, servers and computer equipment for consumers and businesses in the tri-county region of South Florida, including Dade, Broward and Palm Beach county as well as worldwide. Their business solution options include on-site support, managed IT support, cloud computing, Microsoft cloud solutions, online backup and IT relocation.

Cerberus Group founder Anthony Segrich, is enthusiastic about hiring a domestic tech support company to service his high maintenance mobile tech firm. "We hired E-Racer Tech because they were the best fit for the job. With so many international tech support companies entering the market, it's difficult to find a local company that delivers great IT support." says Segrich, "We believe we've found that in E-Racer Tech's business solutions program."

This isn't E-Racer Tech's first rodeo with The Cerberus Group. Recently The Cerberus Group experienced a major breach in its IT security system due to a minor employee oversight. They called in E-Racer Tech to debug their systems and get them up and running. E-Racer Tech's stellar performance was the beginning of a solidified business relationship between the two local small businesses in Delray Beach.

E-Racer Tech will provide server management and IT and support for the mobile technology firm. By securing E-Racer Tech's business solution options, The Cerberus Group will gain complete Windows and Linux support, software updates, with regular maintenance and monitoring. The recent onboarding of E-Racer Tech will open new opportunities for Segrich and company. Bringing on this local tech support company will improve The Cerberus Group's IT security, overall productivity and make room for company expansion.
