

Invast Celebrates Over 3,000 Attendee's To Their Regular Trading Strategy Webinar Sessions

Over 3,000 trader's from Australia and all over the world, have benefited from Invast's webinar training sessions covering a broad range of trading topics.

SYDNEY, AUSTRALIA, September 12, 2014

/EINPresswire.com/ -- Invast, one of the largest and most successful global brokerage firms, is proud to announce that over 3,000 traders, both locally in Australia and around the world, have registered to attend their informative strategy webinar sessions over the last few months.

Ashley Jessen, Director of Communications commented, "From day 1 we have been committed to providing a wide range of educational opportunities for both new and experienced traders, to help each person get to the next level in their trading journey. Trading the global markets, including Forex, Indices, Commodities and Stocks, can be quite challenging at times and so traders of all levels need to get access to the latest strategies and technologies, so they can better refine their own trading plans and execute them with confidence."

Invast typically provides 15-18 live [trading webinars](#) every month including Live Market Analysis, demonstrations on cTrader, MT4 and their proprietary ST24 platforms and a comprehensive range of technical analysis sessions.

Over the course of the last 12 months we've continually gathered feedback and listened to the demand of our attendee's and found 4 key technical analysis modules with the most interest. The sessions we run include Fibonacci and Pivot Points, Identifying Divergence, Ichi Moku and Trading Using Price Action, and so every month we run a mixture of these sessions around convenient time slots with Q&A throughout, so the information is practical.

Invast is one of the largest and most successful global brokerage firms. We offer state-of-the-art trading technology and unparalleled service, catering to all levels of traders.

"In addition to our regular trading webinars, [Peter Esho](#), one of the most respected analysts in Australia, presents a global market outlook presentation, taking into account both technical and fundamental information, providing traders with a firm grounding for the days and weeks ahead," added Jessen.

"Every month Peter Esho covers a new and unique topic focused on what is on traders' minds right now, taking into account the big picture of the world markets and what that means in terms of potential opportunities for every trader. Some of the more interesting topics have been around buying the dip on the global indices, Gold & commodity market outlook and the opportunities available with US tapering," commented Jessen.
