

Installation Of Kanepi Controls & LFL High Bays Reaches Phase 2 At Chrysler Warren Truck

Expected energy savings from the wireless controls and lighting retrofit to exceed \$1MM annually

WARREN, MI, USA, October 26, 2014 /EINPresswire.com/ -- As part of the ongoing lighting and wireless controls retrofit of the [Chrysler](#) Warren Truck Assembly Plant, an additional 250 Light Corporation Semaphore fluorescent fixtures with [Kanepi](#) wireless controls were recently added to the 1,200 plus previously installed. Jeff Mongrain, Manufacturing Engineer at Chrysler Warren Truck, is spearheading this project that began in 2012. When fully completed in early 2015, Chrysler expects to achieve energy savings in excess of \$1,000,000 annually with the new lighting and controls. This energy efficiency project is an integral part of Chrysler Group LLC's corporate commitment to sustainability and the environment.

Upon completion of the lighting and controls project, Chrysler's Warren Truck facility will have the ability to control the highly efficient Semaphore LFL high bay light fixtures to use energy only when, where and to what level is needed, automatically. With Kanepi Wireless Controls, facility managers at Warren Truck have the ability to set light fixtures to a zoning, scheduling, dimming, daylight and sensing protocol that is coordinated and reactive to what is happening in each area of the facility. This ensures energy is only used when and where necessary. According to industry experts, the use of wireless controls in large open-space facilities delivers additional energy savings of 30-70%.

Light Corporation is a progressive lighting designer and manufacturer striving for customer astonishment with friendly customer service, short lead times and innovative, high quality, American-made products ranging from commercial office and industrial LED and fluorescent lighting, to our patented Kanepi Wireless Controls. Our products are designed to provide efficiency and overall user well-being, creating healthier and more energy conscious modern day workspaces. Visit us at www.lightcorp.com

Kanepi Wireless Controls has proven to save [millions of dollars](#) in energy costs for large, open-space facilities with coverage in excess of 22 million square feet of space in the U.S. and across the globe. For more information on this smart energy product visit www.kanepiinnovations.com
