

The Application of 3D Cultures Explained at Advances in Cell Based Assays 2014

*Advances in Cell Based Assays, 11-12 November 2014,
Marriott Regents Park Hotel, London UK*

LONDON, UNITED KINGDOM, October 14, 2014
/EINPresswire.com/ -- [Advances in Cell Based Assays](#)
2014 will aim to provide progressive insights into areas such as 3D cultures, stem cells, label free technologies and phenotypic screening, when the 7th annual event returns to London this autumn. This event will feature 18 case study driven presentations, speakers representing both industry and academia, 2 interactive workshops and 3+ hours of networking.

Highlights this year include an academic led focus session on the application of 3D Cultures.

Hear Dr Dusko Llic MD PhD, Reader in Stem Cell Science from Kings College London, introduce 3D cell culture in oncology research. The address will discuss the first lab grown epidermis as an efficient and cost effective alternative to drug and cosmetic testing, the use of human and pluripotent stem cells and skin barrier models.

This will be followed by a presentation by the Karolinska Institutet Professor, Section Head and Vice Chairman, Dr Magnus Ingelman-Sundberg. The talk entitled: 3D cell culture developments in technology to improve in vitro analyses will review key developments in 3D cell culture and explore the latest technologies essential for pharmaceutical research.

A full programme and speaker line-up is available to download at www.cellbasedassay.co.uk
