

Middle East ANSPs to discuss next-generation air traffic management solutions

Over 80 ATM experts to meet in November to learn about the latest technologies available for air traffic management to optimise air traffic in the Middle East

ABU DHABI, UNITED ARAB EMIRATES, October 16, 2014 /EINPresswire.com/ -- The UAE's General

Optimising airspace is a priority for the region's aviation stakeholders. Airports, airlines and ANSPs all know that congested airspace is a hindrance to profitability & is an area of immediate focus

*." Mohaned El-Mahgoub,
Project Director, IQPC Middle
East.*

Civil Aviation Authority, Qatar Airways, Dubai Airports, Bahrain Civil Aviation Authority, ICAO, the Federal Aviation Authority and more will gather at the Air Traffic Management Summit, to be held in Abu Dhabi from 17-18 November 2014 to learn about region's latest technologies available to optimise airspace, manage air traffic flow more effectively, increase interoperability between stakeholders by adopting collaborative decision making and increasing the capacity of airports by the adoption of dual landing procedures.

"Optimising airspace is a priority for the region's aviation stakeholders that we've been in discussion with while producing this event. Airports, airlines and ANSPs all understand that congested airspace is a hindrance to profitability and as such it is an area of immediate focus."

Mohaned El-Mahgoub, Project Director, IQPC Middle East.

The summit will be followed by a specialised 2-day certified workshop focusing on next generation air traffic management systems. The workshop will detail advanced communication navigation and surveillance systems that will allow airplanes to fly closer together in a safer manner. The session will also delve into the new trajectory-based navigation systems that will become the norm in air navigation due to the increased predictability of flight scheduling through the optimisation of flight routes, which will lead to minimised carbon dioxide emissions and reduce costly fuel burn. The workshop is being run by Assistant Professor Dr. Sergio Ruiz and will be fully certified by the University of Barcelona. The course is a must-attend for those who want to understand the technologies that will be mandatory for compliance with ICAO's Block 1 upgrade and should be attended by ATM professionals from civil aviation authorities, ANSPs, airports, ministries of transport and airlines.

Speakers at this industry forum will include:

- Ahmed Al-Haddabi, COO, Abu Dhabi Airports Company
- Velis Eleftheriou, Airport CNS/ATM Strategy & Development, Dubai Airports
- Capt Jordi Manzano, Instructor, Air Europa
- Aaron Wilkins III, Senior Representative, Federal Aviation Authority
- Mohammad Al Dossari, Director Air Navigation & Aerodromes Department, General Civil Aviation Authority
- Capt. Joachim Wirth, Head of Flight Operations Section, Qatar Civil Aviation Authority

The Air Traffic Management Summit will take place on 17 – 20 November 2014 in Abu Dhabi, UAE. Find the full programme, speaker list and registration form at www.airtrafficmanagementme.com/news, call +971 4 364 2975 or email enquiry@iqpc.ae.
