

# Tate Publishing and Author Michael Barrett—a 2015 team?

*Dobbins, CA— Tate Publishing and author Michael Barrett are in discussions concerning the 2015 release of his new book, **Forbidden Bones: The Dino Conspiracy**.*

DOBBINS, CA, USA, October 19, 2014 /EINPresswire.com/ -- As a leading publisher in the industry, [Tate Publishing](#) thinks Barrett's book will be a great fit for their new 2015 line. Tate is also considering other publications by this author for a multi-book deal.

Director of Book Acquisitions, Stacy Baker said, "The Dino Conspiracy is simply a story, one in which author [Michael Barrett](#) tried to have fun, with what he believes are some of the absurdities of the day. He says, 'If you're one of those people who feel the hair stand up on the back of your neck when someone questions your evolutionary dogma, I encourage you to lighten up, sit back and enjoy a what-if story. Is it possible for a dinosaur to be found with evidence of contemporary human contact? I have no idea. But I do know that secular science finds things all the time that don't fit into their evolutionary model. They discard it for no better reason than 'it doesn't fit' without any consideration as to how it might fit. Evolution is built on the presupposition that, given enough time, life could have sprung from non-living matter simply because of the vast amount of time. All the evidence to date says that life only comes from life. The idea that enough time is all that is needed to negate an impossibility reminds me of the guy whose business model is, "We're losing money, but we can make it up in volume." ' With all the discussion about this topic, this book is a must read!"
