

Globally recognised ISO27001 ISMS lead implementer and lead auditor courses now available live online

ELY, UNITED KINGDOM, October 22, 2014 /EINPresswire.com/ -- [IT Governance](http://www.itgovernance.co.uk), the global leader in cyber security and ISO27001 expertise, has announced that some of its most sought after training courses will be available in live online format. These courses include ISO27001 Certified ISMS Lead Implementer Online, ISO27001 Certified Lead Auditor Online and ISO27001 2013 Certified ISMS Transition Online. Bookings can be made online at www.itgovernance.co.uk/liveonlinetraining.aspx.

Alan Calder, founder and executive chairman of IT Governance says, "In the UK, we are best known for our ISO27001 Lead Implementer training course. We have been delivering this three-day course for years and have seen delegates fly to the UK to attend.

"Thanks to modern technology and communications it is now easier than ever before to offer the benefits of classroom training, i.e. live contact and interactive sessions, as well as the additional benefits of attending a course from the comfort of your home or office, thus saving time and money."

The ISO27001 Certified ISMS Lead Implementer Online course has been enjoying great success since its launch earlier this year, and the number of delegates who prefer signing up for the live online version of the course has increased. This may be due to the fact that Calder, a world-renowned authority on ISO27001, is delivering the course himself. He says that the course has been attended by information security professionals from around the world including North America, Europe and the Middle East. Delegates based north of London in the UK may also prefer attending this course instead of the classroom training.

More recently, IT Governance has launched the ISO27001 Certified Lead Auditor Online course, which, together with the lead implementer course, can also be delivered as part of the [ISO27001 Get A Little Help](http://www.itgovernance.co.uk) and [ISO27001 Get A lot of Help](http://www.itgovernance.co.uk) packages.

The IT Governance Live Online ISO27001 training programme is built on the foundations of the company's extensive practical experience helping organisations throughout the world implement IT management systems. All courses offer a practical, hands-on approach delivered by experienced practitioners.

The ISO27001 live online training courses also provide delegates with the opportunity to study and take an IBITGQ examination. IBITGQ certifications are internationally recognised and include highly regarded qualifications, such as the Certified ISMS Lead Implementer (CIS LI) and Certified ISMS Lead Auditor (CIS LA).

The IT Governance live online ISO27001 training programme is available at www.itgovernance.co.uk/liveonlinetraining.aspx.
