

FarStone Released a New Generation PC Recovery Solution for OEM, Business, and Home

FarStone One is the only solution that creates a factory recovery image on the same system. Users can restore the system with a hot-key from the boot menu.

IRVINE, CA, USA, October 27, 2014 /EINPresswire.com/ -- FarStone known for their refined Total Backup and Recovery® solution, announced the release of FarStone One. The latest recovery solution allows users to create their own factory recovery settings and be able to quickly restore a system in minutes using a hot-key.

The recovery image created includes system files, applications, favorites, emails, music, photos, movies, documents, and all partitions. What makes One unique is that it is the only solution allows users to [create a factory recovery](#) image on the same system (C: drive). And it takes only 3 minutes to restore a system with its built-in patented Rapid Restore function.

"Create a recovery image on the same system effectively gives you the ability to create an [OEM factory recovery](#)," said Peter Lin, Product Manager of FarStone. "The patented technology will benefit OEMs and businesses by decreasing system downtime and increase productivities."

"In addition, One also utilizes patented Rapid Restore technology. By only restoring the modified files, FarStone One system restore can be completed in minutes and is much faster than traditional recovery solutions," stated Peter Lin. The mix of Rapid Restore and capabilities of creating your factory settings make One the perfect solution for businesses and OEMs where system recovery needs to be done quickly or is performed frequently.
