

# Garage Storage Company Offers New Flooring Options

*No Matter The Current State Of Floors, Customers Can Have A Durable Flooring Solution*

REXBURG, ID, USA, November 4, 2014 /EINPresswire.com/ -- Monkey Bar Storage will now offer [Swisstrax flooring](#) to customers across North America, making that durable and beautiful flooring available to all.

Quickly, I found that Swisstrax provides the best quality, products, and durability.”

*Tyler Patterson*

Tyler Patterson, Monkey Bars Flooring Specialist, searched the U.S. for the best flooring options to offer to Monkey Bar Storage’s 120 dealers. “Quickly, I found that Swisstrax provides the best quality, products, and durability,” said Patterson.

While Monkey Bar Storage offers concrete floor coatings, Swisstrax tile flooring is a great option in areas where coatings are not a viable solution. Areas with high water tables can cause concrete floor coatings to become damaged over time. Swisstrax floor tiles allow moisture to pass through to the concrete, without damaging the floor covering.

Swisstrax tiles are an investment that homeowners can take with them to virtually any new home. Before a move, homeowners can easily pack up their tiles and have them installed in their new house once they move in.

Many customers enjoy using tile flooring in their homes because of the varied décor options available. Swisstrax tiles come in 19 different colors and several different finish options that can be catered to complement any area, on the inside or outside, of a home. Some people even choose to place this type of flooring around their pools because of their slip resistant qualities.

Perhaps the most amazing feature of Swisstrax tiles is that they can be professionally installed within a matter of hours. Professional installers can custom-fit these tiles to any room or area and the floor can be used as soon as installation is complete. Additionally, Swisstrax tiles are resistant to ultraviolet rays, harmful chemicals and are extremely strong, allowing for over 75,000 pounds of rollover weight. With a 15-year warranty, they are built to withstand the test of time.

Monkey Bar Storage began in 1999 when entrepreneur, Jared Newman, found that while he had the square footage needed to park a car in his garage, he didn't have the space. Not finding a solution that allowed him to store everything in his garage, he created his own shelving system. The garage storage company he created now includes more than 120 dealers throughout North America. Visit their new website <http://www.monkeybarstorage.com> for home improvement ideas. Today, the company offers garage shelves, racks, cabinets and flooring that can be customized to the unique needs of homeowners and adjusted as needed over time.
