Digestive Enzyme Formula

The digestive formula is made with a variety of specialty techniques and ingredients. The capsules are packed with an enzyme formula that contains a full combination of the essentials and promotes healthy digestive systems and metabolisms. The product is made with many digestive proteins and absolutely no soy, yeast, sugar, dairy, gluten, or preservatives. Each container contains 100 capsules. The digestive enzyme formula was created in the USA, and all the Green Root Wellness products are made with strict GMP standards.

There are several essential primary ingredients in the formula. Betaine is one of the primary ingredients in the formula, and it is a fundamental element of digesting fats and proteins. Pepsin and Papain are both used in the capsules, and they are helpful digestive enzymes that break down harmful proteins. Fenugreek, Ox Bile Extract and Pancrelipase are present and used to help improve food digestion in certain conditions. Amylase is responsible for the digestion of carbohydrates, making this an important element. Pancreatin is an essential ingredient that contains a combination of three enzymes.

A recent customer on Amazon wrote, "Great product! I've been on a health kick for the past year and to keep up with my insane workout regimen, I have introduced all kinds of vitamins and supplements. I started using these enzymes a little over a week ago, and I already see an

increase in my energy level. It is obvious this product is helping me process nutrients more efficiently. Thanks, Green Root!"
