

Meth Lab Cleanup® Company is now offering affordable, online OSHA Hazwoper courses.

Meth Lab Cleanup®'s online courses are interactive and easy-to-navigate.

ATHOL, IDAHO, UNITED STATES,
November 17, 2014 /EINPresswire.com/

-- [Meth Lab Cleanup® Company](#)'s (MLCC) occupational safety and health courses can help you save money, lower worker's compensation premiums and reduce workplace accidents. MLCC is continually intensifying efforts to educate more professionals and offer more choices in course subject matter. Learn from the privacy of your home or workplace, anytime.

Online OSHA training available on this site is everything that you will need to comply with OSHA safety compliance for the clandestine drug lab decontamination industry, construction and general industry. Meth Lab Cleanup is committed to making sure that registration and course presentation are easy to follow; unlike other online courses that are time-consuming and tedious. Meth Lab Cleanup® has exactly what you are looking for in an easy access website at:

<http://methlabcleanup.otsystems.net> . Try us out. We are confident we can meet your needs; cost-effectively.

Joseph Mazzuca, Meth Lab Cleanup®, says that "in many states, OSHA 40 hour Hazwoper and annual refreshers are required prior to being certified in clandestine drug lab decontamination. This portal provides access to all courses needed."

Meth Lab Cleanup® is also offering two [home meth residue kits](#), AccuMeth® and MethAssure® for purchase. AccuMeth® Immediate (patent pending) onsite kit utilizes a lateral-flow immunoassay, visually-read application; much like a pregnancy test. MLCC will soon be introducing a battery-operated, methamphetamine digital reader, Black Box Reader™, for use with the AccuMeth residue test kit. Take readings onsite; then download the data to a computer. In addition, Meth Lab Cleanup® offers the MethAssure® 2-Day laboratory test kit is mailed for analysis after use to an independent, SAMSHA/EPA accredited laboratory which can detect methamphetamine residue to levels below 0.02 µg/100cm²; the lowest detection level in the nation.

Meth Lab Cleanup® Company is an environmental firm on the forefront of the clandestine drug lab decontamination industry. Recognized for excellent customer service and industry-leading technical expertise, Meth Lab Cleanup® has been specializing in comprehensive site assessment, work plan development, regulatory adherence, full service decontamination and quality documentation for over 11 years.
