

# The MEDca 4-Channel RC Micro Quadcopter – Flying Fun in a Variety of Colors and Styles

*The MEDca 4-Channel RC Micro Quadcopter comes ready to fly in a variety of styles and colors, and is lightweight enough to go anywhere users may send it.*

NEW YORK, NY, USA, November 24, 2014 /EINPresswire.com/ -- The MEDca 4-Channel [RC Micro Quadcopter](#) comes ready to fly in a variety of styles and colors, and is lightweight enough to go anywhere users may send it.

With the included control panel, users will be able to send the MEDca 4-Channel Remote Control RC Micro Tiny Quadcopter high into the air and in any direction.

## Built-In Gyroscope for Super Agility

The secret to the copter's swift movements lies in its built-in 2.4GHz Gyroscope Transmitter, which allows the copter to ascend/descend, move forwards and backwards, as well as drift left or right. The copter is so versatile that it can hover in the air or it can be sent into super-exciting 3D tumbling action.

At only 1.5 inches in length and 1.5 inches wide, the [MEDca Micro Quadcopter](#) can fly around any obstacles with ease. Just charge it, set it loose and there is no limit to where this toy copter can go.

## Charging and Fly Time

The device comes with a USB charging cable that can be plugged into any USB-ready device. With as little as 9-minutes of charge time, the RC Tiny Quadcopter will stay aloft for 6-7 minutes of consistent flight time.

The copter blades are comprised of a high-quality and ultra-strong composite material. If they happen to hit an obstacle, they will bounce right off. And since a pair of spare blades are included with every purchase, users of the RC Micro Quadcopter by MEDca will be able to enjoy years of aerial fun.

The MEDca Quadcopter can be used indoors, outdoors and even at night. The flashing red lights will keep the copter illuminated no matter where the device is used. Users will get plenty of ideas

on how to use the Quadcopter in any environment with the included instruction manual. The MEDca 4-Channel Remote Control RC Micro Tiny Quadcopter comes in a variety of colors and styles and is available now at the Medical & More storefront.
