

Ameri100 Successfully Implements SAP Business One in Record Time

Ameri100 completes an SAP Business One implementation in the record time of 72 hours.

EDISON, NEW JERSEY, USA, November 26, 2014 /EINPresswire.com/ -- Ameri100, one of the fastest growing [technology program management](#) companies, announced the implementation of [SAP](#) Business One for its global business. Ameri100, aiming to become the world leader in technology program management, needed a fast turnaround from the enterprise application project team and was able to complete the implementation in the record time of 72 hours.

In the past 2 years, Ameri100 has experienced accelerated growth, expanded its global footprint, added more than 10 partners around the world to its ecosystem and tripled its work force to its current 50 people, while providing value for clients through technology program management. Ameri100 selected SAP Business One as their ERP system because of its features, functionality, and value.

"When implementing SAP Business One at Ameri100, we had to address several critical business needs. These included the ability to create financial statements for external and internal reporting requirements and manage day-to-day financial operations with the control and flexibility required for a rapidly growing business," said Giri Devanur, CEO of Ameri100. With accelerated growth Ameri100 faced a problem that there was no central location for all of the data and no ease of access to pull information on demand. We were having to look historically back into our records rather than looking forward and having our finger on the pulse. Ameri 100 needed to have real time financial information on hand.

"Too many manual processes requiring human intervention just cause mistakes and delays. For me, the success is around automation of processes and our customized financial reports. SAP Business One helped us eliminate 70-80% of manual processes through automation - which I believe provides us with a huge return on investment," said Giri.

SAP Business One helps Ameri100's day to day business by eliminating duplicate entries and errors, closing the books faster by automating processes, having the ability to access accurate real-time financial information, and enabling better business decisions by integrating accounting

data with the other areas of its business.

"The most challenging of deadlines," added Giri. "Yet with great commitment, professionalism, teamwork, and hard work, we achieved a successful implementation of SAP Business One in 72 hours."
