

IT Governance announces Black Friday savings on ISO27000 tools, training, and standards

IT Governance announces its Black Friday deals, with great savings on ISO27000 books, tools, training, and standards.

BOISE, IDAHO, USA, November 27, 2014 /EINPresswire.com/ -- [IT Governance](#), the international provider of cybersecurity products and services, is pleased to announce its [Black Friday](#) deals . These fantastic festive offers will provide great savings for IT Governance's North American customers on ISO27000 books, tools, training, and standards.

Cybersecurity is a hot topic in the run-up to Christmas: in light of the massive data breaches seen so far this year, cautious consumers are keener than ever to see evidence that they will be protected from fraud and cyber crime, and profit-conscious organizations will want to demonstrate that they're protecting their customers.

December is also recognized as the busiest time of the year for cyber criminals, so what better time is there to ensure the safety of your organization than the holiday season?

[ISO27001](#) is the best-practice information security standard that provides your clients and suppliers with the internationally recognized reassurance that you take the protection of their data seriously.

IT Governance's Black Friday offers are all geared towards getting your organization cyber secure at minimum cost, and cover the ISO27001 books, tools, training, and standards that you would normally use to achieve and maintain a level of cybersecurity that will ensure your organization's commercial success over the all-important festive period.

IT Governance Black Friday offers:

- 30% off all ISO27001 online training courses.
- Save \$50 on the ISO27001 and ISO27002 standards.
- Receive a \$100 ITGP eBook voucher with the No 3 Comprehensive ISO 27001:2013 ISMS Toolkit.

All offers are available for a limited time only and end midnight December 1 2014.
