

ISO27001 ISMS Documentation Toolkit comes with three hours of Live Online consultancy support free

ELY, UK, December 3, 2014 /EINPresswire.com/ -- [IT Governance](#), the leading global provider of cyber security and ISO27001 expertise, has reported that it is offering three hours of Live Online consultancy support free with its bestselling No 3 Comprehensive [ISO 27001:2013 ISMS Toolkit](#).

This offer is valid for a limited time only and will be of great value to organisations pursuing ISO27001 certification. Certification brings considerable benefits, including improved security, competitive advantage and increased stakeholder trust.

A new survey by the British Standards Institute (BSI) has revealed that best-practice cyber security frameworks such as ISO27001 help raise awareness of risks. 52% of organisations that had implemented ISO27001 said they were “extremely confident” in their level of resilience against the latest methods of cyber hacking.

Alan Calder, founder and executive chairman of IT Governance, says, “Implementation of and compliance to ISO27001 play an ever more important role in protecting organisations from cyber threats. As the BSI’s survey has revealed, those who implement the Standard can carry on with confidence, while companies that don’t will remain in a state of great uncertainty, stagnating in the hope that ‘this won’t happen to us’.”

As with all projects, documentation is essential in ISO27001. It helps ensure continuity and that daily operations are performed as prescribed. The Standard requires a set of mandatory documents, which are also subject to the certification audit.

Calder says, “We believe that our toolkit offer will help ISO27001 implementers accelerate this project and achieve certification quicker. They will not only receive essential books, dozens of document templates and vsRisk™ software as part of the toolkit, but will also have a chance to talk to an expert consultant to obtain further help and guidance for their project.”

No 3 Comprehensive ISO 27001:2013 ISMS Toolkit provides a comprehensive set of pre-written ISMS documents, including policies, procedures, work instructions, records and guidance documents. It comes with the vsRisk software tool, which automates and delivers an information security risk assessment quickly and easily.

For a limited time only, customers who purchase the No 3 Comprehensive ISO 27001:2013 ISMS Toolkit will receive three hours of Live Online consultancy support free.

The toolkit can be purchased at www.itgovernance.co.uk/shop/p-970.aspx.
