Synergy Builders is a design build home remodeling company specializing in kitchen, basement and bathroom remodeling in Naperville as well as whole house designs and additions. The company has been in existence since 2002 and credits much of its success to their 6-step remodeling process and "Stress-Free Remodeling" operating model.

"We came up with the 6-step remodeling process as a way to hold ourselves accountable not only to our clients but to our own internal standards. The process ensures that nothing slips through the cracks and the customer is always in the loop and kept apprised of our progress. This actually supports our operating model of delivering a stress-free remodeling experience really well, because every step of the process is outlined ahead of time so customers know what's going to happen at any point during the project. We've found that this really helps the client feel good about the project and be satisfied about their experience at the end," explained Ryback.
