

The Secure, Convenient and Stylish Flip Clip

BOCA RATON, FLORIDA, UNITED STATES, December 10, 2014

/EINPresswire.com/ -- The proliferation of phones, tablets and other gadgets in our world today has created a real need in the marketplace for quality accessories. The Flip Clip is both a secure and convenient way to hold a wireless phone, tablet or iPod. There are many ways in which this can be a really useful time saving product. As the Flip Clip is a cross between a fashion accessory and a wireless accessory the Flip Clip allows wearers to go wireless in style.

The Flip Clip is made out of steel with a nickel finish, the clip measures 40 mm by 5 mm and weighs one ounce. Users can quickly and comfortably attach the Flip Clip to any wireless device and most wireless cases as well. However these clips are best suited for wireless cases with a flat smooth surface. The gel style

cases provide the best protection according to industry experts. All wearers have to do is remove the seal covering the 3M super strong adhesive and press it onto the device. The glue dries almost immediately allowing the Flip Clip to be ready almost instantly. Tiny magnets then secure the ring to the body. The Flip Clip is [perfect for everyone](#) especially those who have an active lifestyle. Those who often work out or go out jogging can simply snap the Flip Clip spring and push it against a chain. The snap spring easily pushes against a belt loop or handbag strap as well. The Flip Clip also allows wearers to have the ability to use a hands free video device which they can take anywhere.

The man behind the Flip Clip is Greg Washio. Greg is a Detroit, Michigan born entrepreneur who received his college education entirely in Florida. Greg, a University of Miami graduate, obtained an MBA from Florida Atlantic University. Greg's legitimate educational background is backed up with over 20 years of work experience at BellSouth Mobility as well as AT&T. For the past eight years Greg has designed the Chatt line of custom gifts and fashion accessories. In this role Greg has helped Chatt sponsor the Smile Train Organization which gives children in the developing world free operations for cleft lip corrections. This experience speaks to Greg's ability to design quality products, operate within a successful business and take a community minded approach to business.

To support the production of the Flip Clip, there is a [Kickstarter crowdfunding campaign](#) now in place. This campaign will be ongoing until January 7th. Greg spent several months working with dozens of factories until he was able to find one which could properly make the Flip Clip frames. The design elements are added in America. Reaching the crowdfunding goal will allow for mass production of the

Flip Clips. There are many [crowdfunding rewards](#) available for those who make a contribution to this campaign. Funders are encouraged to go to the Kickstarter webpage in order to see the gorgeous Chatt inspired designs for themselves. As a special promotion businesses have a unique marketing opportunity to have custom clips created with their logo prominently displayed on them. The crowdfunding rewards are as follows:
