

Timber Waste Re-Processor to supply Green Coke to New Zealand Steel Co

CarbonScape, based in the Marlborough region, applies microwave technology to waste from the timber sector

HASTINGS, HAWKE'S BAY, NEW ZEALAND, December 16, 2014 /EINPresswire.com/ -- Timber Waste Re-Processor to supply Green Coke to New Zealand Steel Co . . .

CarbonScape's pending supply of 9,000 tonnes of proprietary Green Coke to New Zealand Steel takes the small alternate feedstock company into the commercial sphere.

New Zealand Steel is owned by the Australian and Anglo-Dutch BHP Billiton which is anxious to underline its own green credentials.

CarbonScape, based in the Marlborough region, applies microwave technology to waste from the timber sector. It claims to have patented this process.

The company is also developing Activated Carbon processes as the basis for a nanotechnology molecular sieve.

The company is applying the most concerted crowdfunding appeal yet seen in New Zealand to raise capital for its industrial capacity plant.
