

# Austin Plastic Surgeon Distinguished With FACS Designation

---

*Dr. Rocco C. Piazza, a plastic surgeon in Austin specializing in breast augmentation and facial treatments, is now a Fellow of the American College of Surgeons.*

AUSTIN, TX, USA, December 21, 2014 /EINPresswire.com/ -- Dr. Rocco C. Piazza ([www.thepiazzacenter.com](http://www.thepiazzacenter.com)), one of the leading plastic surgeons in Austin and founder of The Piazza Center, recently became a Fellow of the American College of Surgeons (FACS), an organization whose membership is limited to board-certified specialists who meet stringent standards.

"It's an honor to be named among this year's FACS group," Dr. Piazza says. "The college is dedicated to maintaining the highest standards in the world for surgeons and surgical education. Becoming a Fellow fulfills one of my professional and personal goals."

By meeting the college's stringent membership requirements, the group says, "Fellows have earned the distinguished right to use the designation of 'FACS' (Fellow, American College of Surgeons) after their names." Dr. Piazza was among 1,640 initiates this year.

Membership in the American College of Surgeons is limited to board-certified surgical specialists. The scientific and educational organization founded in 1913 aims to raise the standards of surgical practice and to improve the quality of care for surgical patients. It is the largest organization of surgeons in the world, and it requires years of advanced training and practical experience, as well as an ethical and professional review by a board of regents.

Dr. Piazza is certified by The American Board of Plastic Surgery, the only plastic surgery board recognized by the American Board of Medical Specialties. He is also a member of the well-regarded American Society of Plastic Surgeons® and several other industry groups.

Dr. Piazza, who grew up in Austin, is a [breast augmentation](#) and facial rejuvenation specialist who earned his medical degree from the University of Texas Medical Branch at Galveston after graduating from Baylor University in 2001. He completed his plastic surgery residency at Michigan State University and trained under world-renowned breast surgeon Dr. Dennis Hammond in Grand Rapids.

Returning to Texas to open Southwest Austin's first [plastic surgery center](#) in 2010, Dr. Piazza says

his goal is to consistently remain on the leading edge of cosmetic and reconstructive surgery, as well as non-surgical skin treatments.

"My top priority as a surgeon is always to provide my patients excellent care and beautiful results," Dr. Piazza says. "Becoming an FACS physician helps me do that. It shows my patients my commitment to ensuring I consistently strive for what's most important to them."

###

Rocco C. Piazza, M.D., FACS, of The Piazza Center ([www.thepiazzacenter.com](http://www.thepiazzacenter.com)) offers the most advanced procedures available to meet a wide range of cosmetic needs. After graduating summa cum laude from Baylor University, he attended University of Texas Medical Branch in Galveston. Dr. Piazza completed his plastic surgery training at the Grand Rapids Medical Education and Research Center in Michigan under 20 board-certified plastic surgeons, including the world-renowned breast surgeon Dr. Dennis C. Hammond. This diverse training experience gave him wide exposure to many different surgical techniques in facial aesthetics, trauma reconstruction, breast and body contouring, and the latest advances in non-surgical facial rejuvenation. Dr. Piazza is a Fellow of the American College of Surgeons and a member of the Spokespersons Network of the American Society of Plastic Surgeons®, representing the prestigious group by providing the media with information on a broad range of plastic surgery topics. Dr. Piazza and his staff are committed to healthy eating, he is an advocate for exercise, and he has created a comfortable practice environment focused on anti-aging skin care, non-surgical facial rejuvenation with injectables (JUVÉDERM®, Restylane®, and Sculptra® Aesthetic) for volume restoration, and reconstructive and aesthetic surgery.
