Lords in Shining Armor Rule in Haypi Kingdom: The Return of the King

Haypi Co., Ltd. is celebrating the new version of their signature game, Haypi Kingdom: The Return of the King

SHANGHAI, SHANGHAI, CHINA, January 13, 2015 /EINPresswire.com/ -- Great news! Haypi Co., Ltd. is celebrating the new version of their signature game, Haypi Kingdom: The Return of the King. Version 1.0.5 is now available for free download at the AppStore. Lately, the mobile developer Haypi has been busy like a bee, making sure that all their fans are entertained!

The new patch of Haypi Kingdom: The Return of the King is an essential update, including lots and lots of new content. The major modifications are in respect to the Equipment System, which has been optimized significantly. Anyone can be a Lord in Shining Armor! Equipment Enhancement is more fun because Soulstones and Silver would be enough to raise the level of the powerful Hero Equipment. There are many exciting ways for the players to get the wanted materials. For example, the magic Soulstones can be acquired through PVE level challenges, tower

challenges, On Guard, and world map combats. These changes have made obsolete the Synthesizing of equipment, as well as the Enhancement stones or Metal Pieces, which are no longer needed.

The new Haypi Kingdom: The Return of the King also features a new way of making Equipment Upgrades. Different kinds of materials could be used to make upgrades, so the special Equipment Potions are no longer needed. As for the unused equipment, it could be sold instead of disenchanted. That's better, because now there is no need of Metal Pieces anymore. Best news is that the Success rate of each enhancement has been raised to 100%. That's really wonderful!
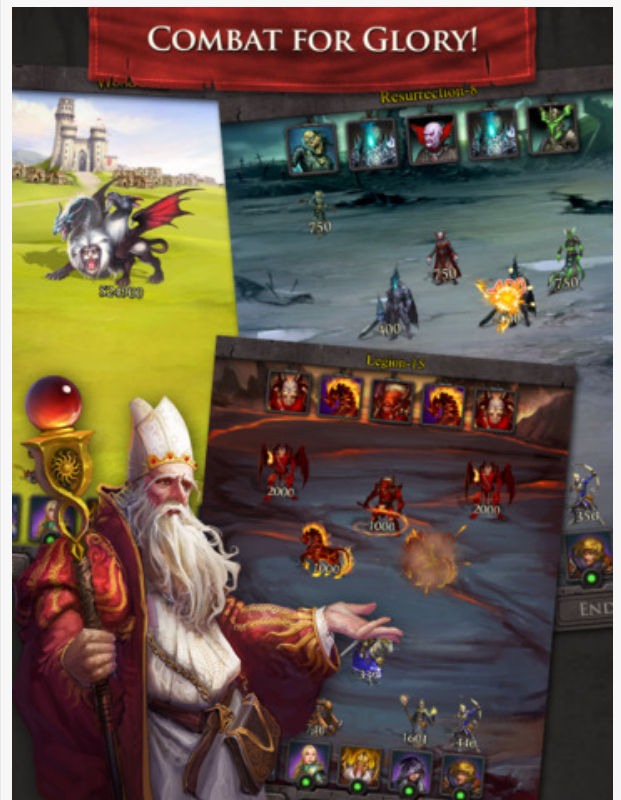

Haypi Kingdom: The Return of the King 1.0.5 is well optimized and smoothened even more. The amazing "Try Your Luck" feature has acquired a Roulette system. Another optimization includes an efficient remodeling of the Hero and Equipment stats, while the performance and benefits remain intact. Besides, the level cap has been raised and players can reach Level 60.

Both fans and professionals know that Haypi works incessantly to improve whatever needs to be fixed, and always optimizes what is already good. No wonder that so many updates of the Haypi games are coming one after the other. Just last month, Haypi Monster version 1.7 became available at the Apple App Store. As Haypi had previously announced, many activities followed the update. This

new patch was well celebrated.

Players seem very happy that Haypi Kingdom: The Return of the King 1.0.5 has hit the AppStore! Haypi Kingdom and Haypi Kingdom: The Return of the King would always remain Haypi's signature games. Thanks to them, the fruits of Haypi's hard work can enlighten the life of many players around the world.
