\*Sales and distribution services

\*Transportation

\*Online visibility

Flexibility:

We offer an opportunity to develop and implement new technological solutions according to our partner's wishes.

We provide additional value to goods/products and are the final link before the final consumer.

Quality:

We would guarantee good quality through:

• the quality and environmental management system standards

ISO 9001:2008 and ISO 14001:2004 integrated in the processes

• constant monitoring and verification of processes

• double checking and tracking all the movements and status of goods

Green thinking: *H.Jackson Brown Jr.*

We use our own combined boiler plant, which would offer the possibility to choose the fuel that is most favourable at any specific moment

We generate green energy with solar panels

Covered loading docks significantly reduce the amount of energy required for generating heat

Lighting between the shelves switches on automatically in only those parts of the room where there is some movement

We sort waste ourselves, which means that we turn waste handling costs into income

Natural light in the warehouse is ensured by transparent smoke hatches in the ceiling
