

The Guru is your All-Encompassing Vaporizing Accessory

JUPITER, FLORIDA, UNITED STATES, January 26, 2015 /EINPresswire.com/ -- The vape movement has been gaining an incredible amount of momentum in recent years. There are many clear reasons why vaping is becoming a favorite social activity for so many people. Using a vaporizer is a natural, medically beneficial way to enjoy the flavor of your favorite products. Vaping is a widely recognized substitute for smoking and smoking ends lives. To cite one example, Mitch Zeller the director of the Food and Drug Administration's Center for Tobacco Products recently stated that using noncombustible products in place of cigarettes would be very beneficial for our overall health. When vaping the user does not use combustion so products are heated at a much lower temperature. The reason why the lack of combustion is so important is that vapers are still able to receive all of the benefits of their favorite blend. However no combustion means no tars or toxins which come from the smoke itself. This lack of dangerous toxins eliminates the risk caused by incredibly harmful carcinogens and other nasty by-products. With the proliferation of personal vaporizers, finding the best all-in-one portable vaporizer is a very important decision. [The Guru by NamasteVapes](#) is that vaporizer.

The logical question is: what makes The Guru stand out in the market. The answer to that question is unmatched technology and versatility. The Guru is a [premium loose leaf vaporizer](#) but is also compatible with all with all standard e-liquid, wax and concentrate cartridges. This allows vapers to connect The Guru

to any cartridge or atomizer of their choice. This is an unprecedented statement for a personal vaporizer. In short users can enjoy whatever they want wherever they want. This makes The Guru a legitimately universal vaporizer for all dry herb aromatherapy, oils and concentrates and e-liquids. The Guru was designed with a powerful and long lasting battery. The extended battery life is vital to keeping The Guru a useful portable vaporizer. Vapers will not lose the freedom to enjoy their favorite herbs or liquids because of a weak battery. The Guru does not require any cords or wires. In addition The Guru uses pulse-width technology to maintain superior control of the heating chamber of the unit. This represents a market-leading performance and control. For dry herbs The guru features a fully ceramic chamber with an all glass vapor pathway and can reach its set temperature within 30-45 seconds. This level of performance is complimented by a temperature sensor which is installed directly on the heating element. These temperature controls utilize a digital display which is very easy to read and understand.

The Guru is the culmination of over a full year of development and design. Throughout this development process the NamasteVapes (www.namastevapes.com) team drew from consumer and vape community feedback. This is a portable vaporizer which is made by vapers and intended to give vapers what they want. The end result is a premium loose leaf vaporizer specifically tailored to meet the needs of this community. The Guru comes complete with a water tool attachment. Portable vaporizers are both compact and lightweight and The Guru is no exception. This vaporizer uses an all glass and ceramic vapor path. This path maintains a very pure and flavorful vapor by eliminating exposure to any plastics or metals. Vaping is meant to be a social activity and with that in mind The Guru acts as a very stylish accessory. The Guru comes in three different colors. Offering another advantage over smoking, The Guru vapor omits only a very mild scent.

Users should remember that The Guru is more than just a quality vaporizer, it is a part of a modern lifestyle. The NamasteVapes team intends to bow to the needs of their consumers and they have done their research to create a superior universal vaporizer. In order to support the production of The Guru an [Indiegogo crowdfunding campaign](#) has now been launched. This campaign will conclude on February 20th. Funders will have a chance to get one of many available crowdfunding rewards. These rewards included everything from a slick steel grinder card to the first Beta test production run units all the way up to a free trip for the product release in Denver next this year.

About:

The Guru is a brand new all-in-one portable vaporizer which is compatible with all standard e-liquid, wax and concentrate cartridges. Also including a superior pulse-width heating technology, The Guru represents a superior personal vaporizer. There is a current Indiegogo crowdfunding campaign in place in order to support the production of The Guru.
