

# BSE Ultra-Slim Plus NOW at Dedicated to Health Medical Group In Pasadena, CA.

*Painless non surgical body sculpting & skin tightening comes to Dr. Stephanie King & Dr. Lisa Ma Dedicated to Health Medical Group.*

PASADENA, CA, USA, February 3, 2015 /EINPresswire.com/ -- Dedicated to Health Medical Group (<http://www.dedicatedtohealth.com>) now offers non-surgical body sculpting treatments at her Pasadena practice along with BHRT, Natural Diet & Nutritional Programs. The procedure's popularity has been growing nationwide in recent years because patients can reduce stubborn fat pockets without incisions, anesthesia, and pain or down time.

BSE's Ultra-Slim Plus is a proven treatment that helps people reduce 'trouble spots' that persist despite healthy diet and exercise habits," [Dr. Stephanie King](#) says. "The procedure is quickly

Stephanie King, DC

becoming one of the most popular non-surgical treatments at my practice."

BSE Ultra-Slim treatments target familiar stubborn spots for many people, such as the abdomen, flanks (love handles), hips (muffin tops), and thighs. An even very fit person with good muscle tone struggle to trim fat from those areas, Dr. King says "you can have the body you want painlessly without surgery".

The Ultra-Slim is based on sound scientific principles and time tested proven technology," Dr. King states. "It's really an effective non-surgical solution. People are amazed at the results, the proof is on our website with the before and after pictures. This equipment is responsible for the celebrities, losing their baby bumps quickly for Red Carpet Events, or touchups before parties.

The treatment uses a controlled ultrasound, which targets unwanted fat cells. Fat cells are more vulnerable to ultrasound than other kinds of tissue, so they are DESTROYED leaving the body, never to return. The body filters out the dead cells through its natural lymphatic processes. Results are immediate with 1-4 inch loss on the first visit. Unlike, its competitor CoolSculpting, releasing reports of results appearing GRADUALLY over the course of 2 to 4 months, and most people see fat reduction of 20% to 25% in the treated area.

"A lot of people come in after failed liposuction or gastric bypass surgery at clinics, and then they learn about this alternative." A large number of people come in for Ultra-Slim treatments before big events like weddings, Red Carpet Events, or parties to quickly fit into that dress or outfit.

Patients say the Ultrasound/RF procedure is comfortable, and it doesn't require any downtime following the treatment. A conductive gel is placed over the area and then a cavitation head is placed on the treated body part for treatment time of 30-40 minutes. Patients report that it feels like a warm massage, without pain or discomfort, and they see results immediately. Unlike its competitors, CoolSculpting patients' reports an initial short-lived, intense freezing sensation before the area becomes numb, like using an icepack. As stated, by Dr. Thomas Hubbard, in his latest press release. Dr. Hubbard is a board-certified plastic surgeon that serves as the medical director of Hubbard Plastic Surgery.

"I think most patients are surprised how simple and straightforward the treatment is," Dr. King says. "It's been a wonderful addition to my practice, and I'm please to offer another safe, effective treatment for my patients."
