The global dermatology devices market is expected to reach \$11,337.0 million by 2019 from \$6,578.23 million in 2014, growing at a CAGR of 11.50%.

Rising incidence of skin disorders and increasing awareness for aesthetic procedures are the primary growth drivers for this market during the forecast period (2014–2019). Moreover, technological advancements and increasing healthcare expenditure are also expected to drive market growth. However, reimbursement issues and stringent regulatory policies for medical devices may hinder the growth of this market.
