

Mesh Networks Selected For 'Top 100 MDU Technology Providers 2014'

Mesh was selected by industry experts as a leading technology provider who enables property owners to offer state of the art technology driven amenities.

HOUSTON, TEXAS, USA, February 13, 2015

/EINPresswire.com/ -- Mesh Networks, a recognized leader in [broadband management](#) solutions has been honored for the third year in a row with a recognition by Broadband Communities in its selection of "Top 100 MDU Technology Providers 2014."

Mesh was again recognized in the October 2014 issue of Broadband Communities Magazine, published by Broadband Properties, LLC. Mesh Networks was selected for the following honor: "Top 100 MDU Technology Providers 2014."

"The fact that Broadband Communities included Mesh Networks in its selection of 'Top 100 MDU Technology Providers 2014,' for the third year in a row demonstrates that Mesh's innovative broadband management solutions and customer service are revolutionizing how bandwidth management is being implemented," said Martin Scheid, CEO Mesh Networks commented on the recognition. "We are proud to be included in this recognition again for 2014."

"Mesh Networks' innovative broadband management solutions eliminate the bandwidth problems associated with rapidly expanding networks due to the vast incremental increase of bandwidth utilization, due to the growth and diversity of mobile and other Internet accessible devices . Mesh solutions are proven to maintain and exceed customer satisfaction and reduce the necessity for additional broadband provisioning," said Joanne Luger, Mesh Networks' Vice President of Sales. "I'm honored to have joined a team who has been recognized by industry leaders as a Top 100 company, but more importantly whose vision and solutions are changing the landscape of the network and broadband industry."

Mesh is well-known for their exceptional patent pending bandwidth management solutions. Mesh has expanded their offerings to include complete [wireless](#) and wired coverage and a flexible, scalable and economical complete end to end data infrastructure solution for any size installation. Mesh's networking experts can integrate their bandwidth management solutions

into an existing system or design for a new build. Mesh's experience and expertise in the [student housing](#), apartment, condo, assisted living, healthcare, hospitality, ISP, and Telco industries is proven to help ease IT related headaches by reducing IT costs, reducing help desk costs, provide additional revenue opportunities, and significantly increase site management and end user satisfaction and quality of experience.

About Mesh Networks:

Mesh Networks are experts in the field of bandwidth management. Mesh Networks has been a provider of bandwidth management and optimization products since 2005. The Mesh Networks provides innovative, state-of-the-art, patent pending broadband management solutions that reduce network costs, open up new markets, and improve margins. Mesh Networks solutions provide the broadband enterprise provider/administrator, residential and business markets with powerful new capabilities in managing their customers' Internet experience.
