

# New webinar by IT Governance covers Asia-Pacific cyber security issues

*IT Governance is going to address the cyber security issues Asia-Pacific businesses face in a free webinar*

SYDNEY, AUSTRALIA, February 10, 2015 /EINPresswire.com/ -- According to PwC's Global State of Information Security Survey 2015, the Asia-Pacific region "reports a 13% decline in information security budgets in 2014. Respondents also report that financial losses due to security incidents increased 22% over 2013."

With budgets falling and losses increasing, there's never been a more important time for Asia-Pacific organisations to ensure that their cyber security solutions are efficient and cost-effective.

[IT Governance](#), the global provider of cyber security products and services, is going to address the cyber security issues Asia-Pacific businesses face in a [free webinar](#):

"Using international standards to improve Asia-Pacific cyber security"

Friday 20 March 2015 4:00pm - 5:00pm WST

[Sign up here >>](#)

Join IT Governance on 20 March 2015, when cyber security expert Alan Calder – the founder and executive chairman of IT Governance – will take you through:

- The current cyber threat.

Understand the risk that insufficient processes, inadequate technology, malicious hackers and a lack of staff awareness pose to your business, with case studies of recent high-profile data breaches.

- Current legislation.

Learn about the current data protection laws in Hong Kong, Australia, Singapore and the Philippines.

- International standards.

Discover how implementing the internationally recognised cyber security standard, ISO 27001, will help get your business cyber secure while supporting your adherence to numerous data protection laws.

International standards collate the best practices of professionals around the world. This webinar will explain how you can take advantage of the collective wisdom of thousands of cyber security practitioners with the international standard for information security management, ISO 27001.
