

E-Racer Tech Introduces New AV Monitoring & Computer Management Programs

Enhanced Business Solutions Services

BOYNTON BEACH, FL, USA, February 17, 2015 /EINPresswire.com/ -- In a recent roll out of new business solution offerings, E-Racer Tech, Llc, a US-based tech support company, introduced two new programs to its small business tech platform. The recent roll out from E-Racer Tech includes a state of the art [AV Monitoring Program](#) and an all-inclusive [Computer Management Program](#).

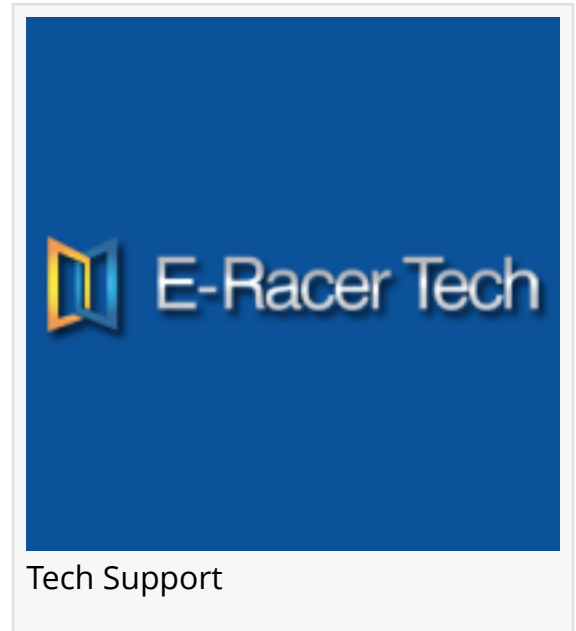

Securing Your Network

The E-Racer Tech specialist developed an innovative Anti-Virus Monitoring Program to secure your personal computer and network. The AV Monitoring Program provides small business owners the surety of knowing that the valuable data of their business and their clients is protected from malicious threats to their computer systems. E-Racer Tech technicians install the anti-virus and connect it to the E-Racer Tech servers. After the connection is made the technicians work constantly to remove any potential threats and keep your network safe and secure.

The AV Monitoring Program significantly reduces the threat of malicious activity for your computer systems without bogging down the speed and functionality of your network. The [E-Racer Tech family](#) understands the importance of keeping the networks of small businesses secure. They also understand that small businesses may not have the capital to secure such protection. That's why E-Racer Tech offers the AV Monitoring Program as a monthly subscription service with no required contract.

Smarter Computer Management Systems

The newly launched Computer Management Program at E-Racer Tech is all-inclusive, encompassing the AV Monitoring, offering small businesses access to the same levels of computer management systems utilized by large corporations. The Computer Management Program: E-Racer Tech developed this remote support program to provide full monitoring of your entire network complete with live technicians for preventive support around the clock.

Computers enrolled in this program are routinely updated and protected by the ESET Security Endpoint. The Computer Management Program offers small businesses unlimited support regarding any software related issue with immediate alerts sent to technicians at the sign of any errors. At the affordable rate of \$20 per month and no contract required, E-Racer Tech is leveling the playing field across technological business solutions for small businesses and large corporations alike.
