CenturyLink® Partners with Centerity to Provide IT Monitoring in the Cloud

One-Time Trial Program for Linux and Windows Server Monitoring

NEWTON, MA, USA, February 18, 2015 /EINPresswire.com/ -- Centerity Systems, Inc., the pioneering developer of next-generation, enterprise-class and carrier-class IT monitoring solutions for complex hybrid IT

A Business Intelligence Layer with Business Analytics with Impact, Trend and Root Cause Analysis

environments, announces its partnership with CenturyLink Cloud to provide IT Monitoring services to its Cloud Ecosystem customers.

CenturyLink Cloud is an all-in-one, cloud platform that delivers high-performance, secure, reliable, and scalable cloud solutions for all workloads. CenturyLink Cloud and its partners provide integrated high-performance cloud hosting, management and managed services. CenturyLink brings self-service managed services together with cloud pay-as-you-go consumption, allowing for unprecedented flexibility and agility.

CenturyLink and Centerity Systems have partnered together to bring Centerity Monitor to CenturyLink customers via the trial offer described below. This trial offer will initially target real-time IT monitoring of Linux and Windows servers for performance and availability.

Centerity Systems is offering a subset of its unified IT monitoring platform as part of a no charge, 30 day, one-time trial program for Linux and Windows servers (up to 10 metrics per host) within CenturyLink's Cloud. Through this unique offer, users will have access to the Centerity Monitor Dashboard, which provides key metrics, summary views of real-time system health and availability, host and service group status, event status, as well as access to all Centerity Monitor reports such as system utilization, usage summary, uptime, trends, and history. Please check with CenturyLink for any access charges that may apply to using its Cloud. This offer will include coverage for the following application metric profiles:

• Linux Server
• Active Directory 2012
• IIS 2012

- Exchange 2013
- SCCM 2012
- SharePoint 2013
- Lync 2010
- MSSQL 2008
- MSSQL 2012
- MSSQL 2014

For a complete set of offer and technical details, please see the Centerity Monitor Technical Guide for Centerity [Cloud Monitoring](#) Info & Guide for CenturyLink Cloud Services at: http://t3n.zendesk.com/entries/62544270-Getting-started-with-Centerity-Blueprints or visit http://www.centurylinkcloud.com/.

"This trial offer is just the beginning," says Marty Pejko, COO of Centerity Systems. "While this offer initially focuses on Linux and Windows services, Centerity is truly an end-to-end IT Monitoring platform providing business intelligence, value and cross domain analytics to the entire organization at all levels whether to the executive, manager or administrator. We intend to roll out the entire platform on CenturyLink Cloud as CenturyLink and Centerity continue to develop advanced offerings together. I can't wait!" - Marty.

About Centerity

Centerity Monitor (http://www.centerity.com/) is a next-gen, end-to-end IT monitoring platform for an organization's entire IT monitoring needs. Centerity Monitor provides business value and real-time analytics regarding the status, performance and availability of all IT assets whether in the cloud or on prem in complex, hybrid environments. Centerity's unique, unified platform, named a [Gartner Cool Vendor](#) in 2014, can serve the needs of both IT executives and administrators while providing a complete business intelligence layer across all IT assets via cross technical and functional domain impact
and trend analysis.

Centerity's unified IT monitoring platform includes coverage for all physical, virtual, application and cloud assets from the physical (switches, servers), network (WAN, LAN, VOIP), application (OS, Standard & non-Standard), virtual (VMware, Hyper-V, Xen), end-user experience (EUX/optional), Big Data (Hadoop, SAP HANA, NoSQL), cloud and [Business Service Management (BSM)](#) layers with multi-tenancy and federated scalability.

Centerity Monitor provides accurate real-time measurements of performance and availability against SLAs with drill-down root cause analysis, intelligent alerting, predictive and trend analysis, inventory and asset discovery, CMDB, ticketing, automation, live maps and visual, interactive graphs, in addition to other advanced features. Centerity Monitor's business value is

to provide business analytics and business intelligence via a unified software platform with superior Time-to-Value (TTV), Total Cost of Ownership (TCO) and Return on Investment (ROI) characteristics.
