

IT Governance announces second edition of 'Assessing Information Security'

ELY, UK, February 26, 2015 /EINPresswire.com/ -- [IT Governance](#), the global provider of cyber security expertise, has announced that the second edition of the book [Assessing Information Security](#) - Strategies, Tactics, Logic and Framework is now available from its e-commerce websites.

Published by IT Governance Publishing (ITGP), *Assessing Information Security* shows how to use principles of military strategy to defend against cyber attacks, enabling organisations to have a more structured response to malicious intrusions.

The authors have drawn on the works of Clausewitz and Sun Tzu, and applied them to the understanding of information security that they have built up through their extensive experience in the field. The result is expert guidance on information security, underpinned by a profound understanding of human conflict.

The book explains the priorities for robust cyber security, helping readers to decide which security measures will be the most effective.
