

SEI introduces the PaperOne fully digital cutting machine at DSCOOP 10th Annual Conference

Equipped with dual-laser technology, PaperOne is the fastest and most flexible machine on market for complex die-cutting of packaging, greeting cards & more.

WEST HARTFORD, CT, USA, March 3, 2015 /EINPresswire.com/ -- WEST HARTFORD, Conn.—SEI S.p.A. of Curno, Italy, and Matik, Inc.—SEI's North American distributor of converting machines—are proud to introduce the PaperOne Laser System at DSCOOP (Digital Solutions Cooperative), booth 821, in Washington, DC. Equipped with dual-laser technology, PaperOne is the fastest and most flexible machine on the market for complex die-cutting of packaging, greeting cards, literature, posters, envelopes and more. For in-line operation, PaperOne can be integrated with any digital press, including the HP Indigo 10000 and 30000 digital presses.

SEI's PaperOne Laser System consistently die-cuts, micro-perforates, pierces, engraves and marks paper, cardboard and adhesive-coated stocks as well as PP, BOPP and PET. PaperOne is the only system that delivers perfect registration for single-sample or batch production.

“An advanced system that is easy to operate, PaperOne's flexibility and speed are unmatched by traditional or competitive die-cutting machines,” states Steve Leibin, executive vice president, business development, Matik, Inc.

Its fast, accurate feeder can handle many different sizes up to 19.65 by 27.55 inches (50 by 70 cm) and thicknesses from 0.007 to 0.027 inches (0.20 to 0.70 mm).
