Crop protection chemicals market, by crop type

The global crop protection chemicals market consists of four crop type categories, namely cereals & grains, oilseeds & pulses, fruits & vegetables, and other crops. Other crops include sugarcane, plantation crops, and turfs & ornamentals. Cereals & grains is the major market for crop protection chemicals which is dominated by North America. Fruits & vegetables is the second-largest market which is again dominated by the North American region.

Asia-Pacific: The largest market for crop protection chemicals

The crop protection chemicals market was dominated by the Asia-Pacific market in 2013; however, the difference between Asia-Pacific and North American markets is very minute. China's market is estimated to have the greatest potential in the Asia-Pacific region and is projected to grow at a CAGR of 6.8% from 2014 to 2019. Japan is another promising market in the Asia-Pacific region, which had a dominant herbicides market in 2013.
