

Quincannon Asia Pte Limited - Chartering Shipbrokers in Specialised Tankers (Gas&Chems)

Long established Singapore based shipbrokers start 2015 with fresh direction.

SINGAPORE, SINGAPORE, January 12, 2015 /EINPresswire.com/ -- The name [Quincannon](#) has been associated with the chartering of chemical tankers and gas tankers in NYC since the 1960's. With the increase in clients trading and operating globally there became a need to have representation in other parts of the world, and in 2000 Quincannon Associates invested in a joint-venture in Singapore which became as of December 2014 Quincannon Asia Pte Limited. With the same goal in mind and only a few years later, an office was opened in Shanghai in 2004 and is now Quincannon Asia Limited.

The Quincannon group are ship-broking companies that act on behalf of their clients as a liaison between the clients and their business partners, whether securing cargo for vessels, or vessels for cargo, or in providing detailed and up-to-date information and market forecasts as required by each client. In particular, the broking-staff of [QA](#) specialise in the chartering of tankers for the carriage of liquids, specifically any liquids that may be carried by Chemical Tankers (IMO I-II-III) and Gas Tankers (VLGC, fully-refrigerated, semi-refrigerated, and pressurised). The cargo list includes but is not limited to liquid chemicals, BTX, aromatics, edible oils, bio-diesels, acids, solvents, lube oils, base-oils, ethanol, MeOH, CSS, acids, LPG, olefins, VCM, NH₃, LNG and other associated products.

The trust and respect of our clients is imperative and something that we value.

Mark Mirosevic-Sorgo

The company in Singapore first opened in May 1998 to provide global cover to the groups' corporate clients, as well as a specialised local service for regional clients, a service that we still provide in full cooperation with the offices in New York and Shanghai. The trust and respect of our clients is imperative and something that we value.

QA's locations

QA's broking and operations teams are here to offer their help in providing assistance, guidance and solutions for any problems that may arise whilst deciding whether a charter is required, whilst any charter is in course, and after the completion of the charter. Through being well informed and by providing a first class service to its clients, QA has earned the reputation of being a market leader within the chemical and gas shipping communities. We are confident that QA will be able to handle any business that you may entrust us with.

The QA chartering and operations departments sit in close proximity and liaise constantly to ensure not only a smooth transition from pre- to post-fixture, but also to maintain a commercial aspect during execution of the contract, the focus always being to foresee and prevent problems from occurring.

the group are members of the AFPM, EPCA, GPCA, APIC regional chemical associations as well as many other more specialised local and global industry related institutes and associations.

All of the above helps QA to assist you in finding acceptable and suitable solutions to any ocean-going bulk shipping transportation problems that may arise, for virtually any liquid specialised product.
