

IT Governance delighted with client Reevo's ISO 27001 certification success

ELY, UK, March 25, 2015 /EINPresswire.com/ -- [IT Governance](#), the global leader in [ISO 27001](#) expertise, is delighted that its client, Reevo, a ratings and reviews service provider, has achieved certification to ISO 27001:2013. Reevo used IT Governance ISO 27001 consultancy and penetration testing services to prepare for certification.

Alan Calder, founder and executive chairman of IT Governance, says, "I am pleased to congratulate Reevo on their successful ISO 27001 certification. Meeting the requirements of the information security standard ISO 27001 requires management commitment and rigorous implementation. It is a project that is fully justified by its benefits, however, which include improved information security, enhanced reputation and competitive advantage, and increased staff awareness."

Reevo CEO Jonathan Callcut said the company was delighted to have achieved the certification.

"Reevo connects consumers with their peers, and also directly with brands. In doing so we collect a lot of sensitive data. We've always taken this role very seriously, and have made significant investments in data security from the beginning. Reaching ISO 27001 certification was the next natural step for us - it's a necessity for our blue-chip customers and will only be more important as Reevo continues to grow."

ISO 27001, alongside its companion code of practice, ISO 27002, sets out the specifications of an information security management system (ISMS). It encompasses people, processes and technology, recognising that the overall approach to information security should be strategic as well as operational, and different security initiatives should be prioritised, integrated and cross-referenced to ensure overall effectiveness.

ISO 27001 certification is often a supply-chain requirement and, as such, can help organisations broaden their client base and supply-chain network, and support business opportunities in international markets where the standard is recognised.

IT Governance is the only company offering global online access to training and consultancy services for ISO 27001. Its [ISO 27001 packaged solutions](#) can be deployed by any company, anywhere in the world, that wishes to implement the ISO 27001 standard and prepare for certification.

Each solution is a combination of products and services in a fixed-price, fit-for-use package sure to meet any organisation's preferences for tackling ISO 27001 compliance projects without the associated complexities and costs.

ISO 27001 'The Basics', 'Do It Yourself', 'Get A Little Help', 'Get A Lot Of Help' and 'We Do It For You' packages can be booked online at www.itgovernance.co.uk/iso27001-solutions.aspx.

Alternatively, organisations can call +44 (0)845 070 1750 or send an email to request a custom quote.
