

Fluoropolymer Coating Market worth \$1,534.30 Million by 2019

Fluoropolymer Coating Market research report segments the market on the basis of type, end-user and region along with forecast of revenue & analyzing trends.

DALLAS, TEXAS, UNITED STATES, March 24, 2015 /EINPresswire.com/ -- The report, "[Fluoropolymer Coatings Market](#) by Type (PVDF, PTFE, FEP, ETFE, Others), by End User Industry (Food Processing, Chemical Processing, Electrical & Electronics, Building & Construction, Others), by Region- Trends & Forecasts to 2019" defines and segments the Fluoropolymer coating market with analysis and forecast of the market size.

Browse 87 market data tables and 55 figures spread through 165 pages and in-depth TOC on "Fluoropolymer Coatings Market by Type (PVDF, PTFE, FEP, ETFE, Others), by End-User Industry (Food Processing, Electrical & Electronics, Chemical Processing, Building & Construction, Others), by Region - Trends & Forecasts to 2019".

The Fluoropolymer Coatings market is estimated to reach \$1,534.30 million by 2019, signifying firm annualized growth of 6.36% between 2014 and 2019.

Asia-Pacific – The biggest market of Fluoropolymer Coating

Fluoropolymer coating systems are prepared from fluoropolymer resin such as PTFE, PVDF, FEP, ETFE resin. The coating system consists of fluoropolymer resin along with binder resins, solvent, pigments and additives. The ratio of these components in the system dominates the characteristics of coatings and they are unique and proprietary for each coating manufacturer.

Building & Construction Industry – The fastest-growing consumer of fluoropolymer coating

PVDF based coating systems are highly durable coating systems extensively used for coating architectural aluminum surfaces as well as post-formed steel sheets (metal coils). PVDF coatings constitute 15.03% of the overall consumption of fluoropolymer coating. PVDF coatings have been widely accepted in building & construction industry because of low maintenance cost, gloss and color retention and stain resistance properties. PVDF coatings also possess excellent coating tensile strength and elongation, which enables them to bent and roll without causing damage to the coating or loss of protection to the metal substrate.

China and the U.S. are at forefront of fluoropolymer coating consumption, while Italy, Japan, and the Germany are other key markets for fluoropolymer coating consumption. China is the key market in Asia-Pacific, consuming more than half of the demand for fluoropolymer coating, followed by Japan, South Korea, and India where consumption is growing at a steadily. Increase in the consumption of

fluoropolymer coating for food processing, chemical processing and electrical & electronics has been observed in Asia-Pacific due to continued industrialization and rise in the manufacturing sector of the region. Building & construction is projected to be the fastest-growing end-user segment followed by electrical & electronics between 2014 and 2019. The increasing environmental legislations are slowing the growth of fluoropolymer coating. The use of fluoropolymer coatings is increasing due to demand of durable and high performance coatings throughout the world. Processors, manufacturers and builders alike want to reduce their maintenance cost and increase the life of their equipment or buildings. Moreover, fluoropolymer coatings allow for a better performance of equipment with cheaper investment as against the same operation in processing industries by expensive alloys.

About MarketsandMarkets

MarketsandMarkets is world's No. 2 firm in terms of annually published premium market research reports. Serving 1700 global fortune enterprises with more than 1200 premium studies in a year, M&M is catering to multitude of clients across 8 different industrial verticals. We specialize in consulting assignments and business research across high growth markets, cutting edge technologies and newer applications. Our 850 fulltime analyst and SMEs at MarketsandMarkets are tracking global high growth markets following the "Growth Engagement Model – GEM". The GEM aims at proactive collaboration with the clients to identify new opportunities, identify most important customers, write "Attack, avoid and defend" strategies, identify sources of incremental revenues for both the company and its competitors.

M&M's flagship competitive intelligence and market research platform, "RT" connects over 200,000 markets and entire value chains for deeper understanding of the unmet insights along with market sizing and forecasts of niche markets. The new included chapters on Methodology and Benchmarking presented with high quality analytical infographics in our reports gives complete visibility of how the numbers have been arrived and defend the accuracy of the numbers.

We at MarketsandMarkets are inspired to help our clients grow by providing apt business insight with our huge market intelligence repository.
