

TSI Expands Partnership with GSA to State and Local Government Agencies

TSI expands its partnership with the U.S. General Services Administration (GSA) to include state and local government agency online purchases.

SHOREVIEW, MINNESOTA, USA, March 31, 2015

/EINPresswire.com/ -- TSI, the industry leader in the design and manufacturing of precision measurement instrumentation and environmental monitoring solutions, expands its partnership with the U.S. General Services Administration (GSA) to include state and local government agency online purchases. By using the purchasing power of the federal government, cities and towns can now purchase certain TSI instruments via the GSA Advantage!® Disaster Purchasing Program in an effort to reduce costs and maximize efficiency.

GSA's Disaster Purchasing Program allows state and local governments to buy products, supplies and services through all GSA Schedules in preparation or response to disasters, as well as recovery from major disasters. Whether it concerns a major weather event, terrorism, or nuclear, biological, chemical, or radiological attack, GSA's strong partnerships helps cities and towns meet their needs quickly while saving taxpayer dollars.

Eligible TSI instrumentation available for purchase through this program include a variety of indoor air quality meters, [ventilation test instruments](#), [respirator fit testers](#) and [dust monitors](#).

Vince Majkowski, TSI Americas Sales Manager, stated, "TSI is excited about the opportunity to participate in an efficient purchase option to reduce the time, cost and bureaucracy to state and local agencies in times of crisis and in preparation of a potential crisis. It also presents states and local agencies with the assurance of partnering with a qualified/pre-approved vendor to facilitate quick, easy purchases."

About TSI Incorporated

TSI Incorporated serves a global market by investigating, identifying and solving measurement problems. As an industry leader in the design and production of precision instruments, TSI partners with research institutions and customers around the world to set the standard for measurements relating to aerosol science, air flow, health and safety, indoor air quality and biohazard detection. With headquarters based in the U.S. and field offices throughout Europe

and Asia, TSI has established a worldwide presence in the markets we serve. Every day, our dedicated employees turn research into reality.
