

Renewable Energy Corporation Participating In Earth Day Event For Secret Service

Leading mid-Atlantic solar energy company receives honor of being asked to participate in Secret Service celebration.

LUTHERVILLE-TIMONIUM, MD, USA, April 9, 2015 /EINPresswire.com/ -- Maryland-based solar energy company, Renewable Energy Corporation is honored to have been chosen by the United States Secret Service to attend and answer questions at their Earth Day Celebration on April 15, 2015.

“

Renewable Energy was chosen due to its prominence as a key player in residential solar energy options throughout the entire mid-Atlantic region.”

Ryan McNeil

"Renewable Energy was chosen due to its prominence as a key player in residential solar energy options throughout the entire mid-Atlantic region," said Ryan McNeil, CEO of Renewable Energy Corporation. "Also, Renewable Energy has set itself apart from the competition by being able to

offer optional battery backup systems as well as the fact we exclusively offer only the highest quality products that are only manufactured in the U.S.A."

In anticipation of this upcoming Earth Day celebration, held a week ahead of the actual holiday on April 22, the Secret Service sought out representatives who would be able to discuss and answer questions about specific renewable energy programs at their event, which last year had over 400 individuals attend.

"This is the second time Renewable Energy Corp. has been invited by a major governmental department to offer its solar options to employees during an event promoting the benefits of solar," McNeill said. "Last October, the U.S. Department of Transportation (DOE) had Renewable Energy on hand at its headquarters for a similar event. Renewable Energy Corp. is honored to both participate in these events and be held in such high regard by these organizations."

About Renewable Energy Corporation:

Renewable Energy Corporation is one of the mid-Atlantic region's largest residential solar energy companies. Since 2002, our experienced solar panel installers have built hundreds of commercial and residential solar energy systems in Maryland. We're a big reason Maryland's solar-power use is on the rise.
