Market Application (Neuro & Spine Surgery, Plastic and Reconstructive Surgery, Oncology, Ophthalmology, Gynaecology & Urology, Dentistry, Documentation), & End User (Hospitals, Outpatient Facilities) - Global Forecast to 2020" provides a detailed overview of major drivers, restraints, challenges, opportunities, current market trends and strategies impacting the global market along with estimates and forecast of revenue.

<http://www.marketsandmarkets.com/Market-Reports/surgical-microscopes-market-179225920.html>

The global surgical microscopes market is poised to reach \$806.6 million by 2020 from \$402.2 million in 2014, at a CAGR of 12.3% from 2015 to 2020.

Factors such as need for high speed diagnostics, advancement in the healthcare facilities, and increase in the demand for minimally invasive surgeries (MIS) are driving the surgical microscopes market. However, the high cost of advanced surgical microscopes; implementation of excise tax by the U.S. government; and the heavy custom duty on medical devices are hindering the growth of this market.

For Detailed Report Information do [Inquiry](#)

The surgical microscopes market is segmented on the basis of application, end user, and region. The surgical microscopes applications market is categorized into neuro & spine surgery, plastic & reconstructive surgery, oncology, ophthalmology, gynaecology & urology, ENT, dentistry, and documentation. In this market, Oncology is the fastest growing application due to growing prevalence of cancer around the world.

On the basis of end users, the surgical microscopes market is classified into hospitals and outpatient facilities. In this market, hospitals are the major end users.
