

Eandis to Discuss Smart Meter Data Acquisition at London Conference

SMi's 2nd annual conference on Meter Asset Management will be taking place on the 22nd – 23rd June 2015 at the Holiday Inn Regents Park Hotel in London, UK.

LONDON, LONDON, UNITED KINGDOM, April 13, 2015 /EINPresswire.com/ -- Eandis is responsible for distributing natural gas and electricity to an extensive network across 234 towns, cities and municipalities in Belgium. Like many other utility companies across Europe that are currently installing smart meters for consumers, each country is meeting these goals within different time frames. Currently the UK is at a crucial stage in the road towards full roll outs and gas, electricity and some water suppliers face similar challenges in managing existing meter assets and planning for the roll out and maintenance of smart meters.

Dirk Costrop, Project Manager [Smart Meter](#) Data Acquisition Smart Meter Programme from Eandis, will be speaking about this pertinent topic at SMi's 2nd Annual Meter Asset Management [conference](#) on 22-23 June in London, UK.

He will be discussing what energy suppliers expect from a smart meter and will also give unique insight into the top 7 things new meters should incorporate and what needs to be done to make these available.

This conference will cover issues relating to new smart meters as well as focus on looking at the retention of traditional metering and the many processes involved in switching them over. The unique and comprehensive programme will provide a platform to shed some light on the ongoing changes in meter asset management.

Reasons to Attend:

- Listen to an update on the SMDA
- Learn how to implement best practice being used across Europe

- Understand how to train and optimise your workforce
- Discuss how interoperability can be implemented
- Hear how to maximise the benefits of smart metering

Key Speakers Include:

- Brendan McGarry, Head of Service, SMDA Scheme Operator, Gemserv Ltd
- Senior Representative, Department of Energy and Climate Change
- Neil Robertson, Chief Executive, EU skills
- Dennis Palmer, Head of GB Smart Metering Programme Liason, Smart Energy GB
- Stephen Dallas, SMART Meter Deployment Optimisation Manager, Deployment Operations Centre, EDF Energy
- Dirk Costrop, Project leader Smart Meter Data Acquisition, EANDIS
- Brian Stratton, Head of Distribution Capital Delivery , UK Power Networks
